

ARITHMETIC FOR HUMAN BEINGS

An anti-textbook for people who loathe arithmetic

Robert Froman

WHAT DO YOU THINK IS
THE WRONG ANSWER TO:

"HOW OLD
ARE YOU?"

"Ten."

"Going on eleven."

Ten years, seven months, seventeen days and six hours.

Traditional arithmetic is taught as if the third answer were the right one for everyday life. This book shows you that it isn't, whether you're balancing your checkbook or shopping in a supermarket.

Arithmetic For Human Beings An Anti Textbook For People Who Loathe Arithmetic:

Why Is There Philosophy of Mathematics At All? Ian Hacking, 2014-01-30 This truly philosophical book takes us back to fundamentals the sheer experience of proof and the enigmatic relation of mathematics to nature It asks unexpected questions such as what makes mathematics mathematics where did proof come from and how did it evolve and how did the distinction between pure and applied mathematics come into being In a wide ranging discussion that is both immersed in the past and unusually attuned to the competing philosophical ideas of contemporary mathematicians it shows that proof and other forms of mathematical exploration continue to be living evolving practices responsive to new technologies yet embedded in permanent and astonishing facts about human beings It distinguishes several distinct types of application of mathematics and shows how each leads to a different philosophical conundrum Here is a remarkable body of new philosophical thinking about proofs applications and other mathematical activities

Hyperreality Mike Hockney, 2013-07-28 What is time Scientists know how to measure time but they have no idea what it actually is This books explains the deep mystery of time It clarifies all of the enigmas concerning the tensed and tenseless theories of time and addresses McTaggart s famous claim that time is unreal Hegel s classification of good and bad infinity is analyzed and a new mathematics of infinity is introduced based on the concept of the finite infinite as opposed to the infinite infinite The correct answer is given to Zeno s notoriously problematic paradox of the race between Achilles and the tortoise The Hotel Infinity model of the Big Bang is analyzed and shown to be far superior to conventional Big Bang theory The Sensorium and Cognitorium are discussed and multiple accounts of consciousness including dream consciousness and Jungian archetypes The issue of private language is analyzed and used as a proof for the non existence of the Abrahamic God

The God Game Mike Hockney, 2013-09-30 What is the answer to everything Pythagoras provided a glimpse of the answer 2 500 years ago when he declared All things are numbers Mathematics is literally everything Unlike science mathematics offers certainty and absolute knowledge Mathematics unifies science religion and metaphysics and is the true Grand Unified Theory of Everything No experiment can ever contradict a mathematical truth Mathematics is the ONLY answer to everything Mathematics is the ONLY subject inherently about eternal Platonic truth The God Series starting with The God Game reveals the astonishing power of ontological mathematics to account for everything Isn t it time to convert to to the world s only rational religion Illuminism the Pythagorean religion of mathematics that infallibly explains all things and guarantees everyone a soul that s not only eternal and indestructible but also has the capacity to make each of us a true God Isn t it time to become Illuminated The God Series is what God ought to have delivered to humanity rather than the Bible Knowledge rather than faith Truth rather than fantasy

Contra Mundum Adam Weishaupt, 2016-04-29 I m plotting revolution against this lie that the majority has a monopoly of the truth What are these truths that always bring the majority rallying round Truths so elderly they are practically senile And when a truth is as old as that gentlemen you can hardly tell it from a lie Dr Stockmann in Henrik Ibsen s play An Enemy of the People

Contra Mundum is a handbook for all those who think there is something fundamentally wrong with the world. The ancient Gnostics claimed that the world was actually created and ruled by the Devil the Demiurge hence why everything is so hideous unfair and horrific. Modern Gnostics Illuminists assert that the problem with the world is that it is ruled by the forces of unreason rather than reason by Mythos rather than Logos by silly story based religions rather than mathematics philosophy and science.

Mathematics and the Aesthetic Nathalie Sinclair, William Higginson, 2007-12-28 A majority of the chapters in this book first saw the light of day as talks at a conference organised and held at Queen's University in Kingston Ontario Canada in April 2001. This small invitational meeting tellingly entitled Beauty and the Mathematical Beast brought together a range of academics interested in and committed to exploring connections between mathematics and aesthetics. The enthusiastic response of participants at this gathering encouraged the presenters to expand upon their initial contributions and persuaded the organisers to recruit further chapters in order to bring a greater balance to the whole. The timing of this event was not arbitrary. The preceding decade had seen a resurgence in serious writing dealing with deeper relations between mathematics and science and the beautiful. In many ways we the editors of this volume found these contributions to the literature were revisiting and drawing on themes that had been prominent over two thousand five hundred years ago in certain writings of the Pythagoreans. While not intending to offer a historical reappraisal of these ancient thinkers here we have none the less chosen to invoke this profound interweaving of the mathematical and the aesthetic to which this reputedly secretive philosophical sect was extensively attuned. This book is divided into three sections comprising three chapters each each with its own short introduction discussing the particular chapters within.

Science's War On Reason Mike Hockney, 2016-01-02 People can't reason. They don't even know what reason is. Reason is almost always harnessed to something that has nothing to do with reason. Believers in mainstream religion are feeling types who reason with their emotions or with their mystical intuitions. Scientists are sensing types. They subordinate their reason to their senses. All scientists are empiricists and are opposed to rationalism i.e. the existence of a rational order of reality completely removed from the human senses which can only be apprehended rationally logically mathematically and via intellectual intuition. Scientists try to don the cloak of rationalism even though they are explicitly opposed to mathematical rationalism which addresses a more fundamental noumenal reality than the one amenable to phenomenal science.

A Critical Introduction to Mathematics Education Mark Wolfmeyer, 2023-03-16 The second edition of Mark Wolfmeyer's award winning primer offers future and current math teachers an introduction to the connections that exist between mathematics and a critical orientation to education one that accounts for race social class gender sexuality language diversity and ability. Expanded and updated from the first edition this book demonstrates how elements of human diversity and intersectionality have real effects in the mathematics classroom and prepares teachers with a more critical math education that increases accessibility and equity for all students. By refocusing math learning toward the goals of democracy and social and environmental crises the

book also introduces readers to broader contemporary school policy and reform debates and struggles especially in light of Covid 19 and the ongoing struggle for racial equity Featuring concrete strategies and examples in both formal and informal educational settings as well as discussion questions for teachers and students text boxes with examples of critical education in practice a glossary and suggestions for further reading Mark Wolfmeyer shows how critical mathematics education can be put into practice relevant for undergraduate and graduate students in education current teachers and teacher educators

The Book of Mind Dr. Thomas Stark, Discover how ontological mathematics explains telepathy homeopathy out of body experiences near death experiences the placebo effect d j vu jamais vu reincarnation demonic possession enlightenment the afterlife the soul and God When scientific materialism and empiricism is replaced with scientific idealism and rationalism everything about science changes Mind replaces matter as the basis of existence Reason and logic not the fallible human senses become the means to discover ultimate reality The Principle of Sufficient Reason and Occam s razor replace sensory experiments as the route to reliable knowledge A universe of spacetime only is replaced by a universe of spacetime AND non spacetime Non spacetime is an immaterial frequency Singularity which serves as a Cosmic Mind The Cosmos is a hologram inside the Cosmic Mind just as a dreamworld is a hologram inside your individual mind Are you ready to overcome the reducing valve of human consciousness and expand your mind to the maximum **The Opposite of Hate** Sally

Kohn,2018-04-10 Brilliantly illustrates the immense and disarming power of changing course and driving not toward division but toward civility and mutual respect Ms magazine As a progressive commentator on Fox News and now CNN Sally Kohn has made a career out of bridging intractable political differences In this age of dangerous partisan resentment and rising bigotry she decided to investigate hate itself to better consider how we can stop it With her trademark humor and humanity Kohn introduces us to leading researchers and scientists who are exploring the evolutionary and cultural roots of hate She travels to Rwanda to the Middle East and across the United States talking with former terrorists and reformed white supremacists and even sitting down with some of her own Twitter trolls What she discovers is surprising All of us harbor hate but the powerful acknowledgment that we are all in this together can lead us out of the wilderness The opposite of hate is connection **The Birth of Ontological Mathematics: The Origin of the Ultimate Intellectual Revolution** Jack

Tanner,2021-07-27 Ontological mathematics is the rational and logical explanation of everything Where did it come from If you wish to develop a profound understanding of ontological mathematics the science that will shape the future of the human race you need to know the context in which it evolved and how it diverged from scientific materialism Ontological mathematics is the subject that accomplished what scientific materialism considered impossible It inserted mind into science via the most powerful analytic formula in all of mathematics What went wrong with how scientists think about reality leading them into systemic error This is the extraordinary tale of how the ultimate intellectual revolution unfolded in its earliest phase *George Orwell, Updated Edition* Harold Bloom,2009 Presents a collection of critical essays on the works of George
