Researching Primary Education Rebecca Austin, 2016-05-16

How do we know what works in primary schools? How do we make sure that we are always learning from fellow teachers, always learning from the children we teach, and always moving forward? The answer lies in research. In understanding, conducting, disseminating, and learning from research. But what do we mean by research, and how do we do it? This book is your guide to research in primary education. It takes you through both important established theory and recent developments in research and explores what these mean right now for primary education and classroom settings. It helps you to conceive, conduct, write up, and share your research with others. It looks at how you can access research findings to improve your classroom practice and deepen your understanding. It examines how you can use research in your classroom everyday to continually enhance teaching and how you can shape and frame the questions you ask to help you get to the answers you need. If you are a trainee teacher doing a research project as part of your course or a qualified teacher doing further study, this text includes all the guidance you need. If you are a teacher wanting to find out what works best for your class in your school right now, this text will show you how to harness the power of small or large scale research to help you find the answer.

The Research Student's Guide to Success Pat Cryer, 2000-10

The first edition of Professor Cryer's book was absolutely outstanding in four main respects. First, it is comprehensive in its scope, covering everything from applying to undertaking a research degree. Second, it is applicable to PhDs across the board. Third, the book is exceptionally well written and highly readable. Finally, at each stage, Pat Cryer has included questions and exercises to enable readers to reflect on their practice, check out whether they are on track, and if not, discover how they might return themselves to it. Overall, Pat Cryer has made a major contribution to the field and produced a quite exceptional book. It ought to be compulsory reading for intending or actual postgraduates and for academic staff teaching research training programmes.
