Agricultural Price Policy Isabelle Tsakok,2019-05-15 Many governments of developing countries burdened with international debt are under ever increasing pressure to use their scarce economic resources wisely Faced with slow progress in alleviating poverty and stimulating economic growth they especially need to end wasteful subsidies and revise inefficient tax policies This book will help staff members of government planning agencies and ministries of finance and

agriculture to analyze the effects of government policies on the production consumption and export of agricultural commodities The analytical techniques that Isabelle Tsakok demonstrates in this book are the essential first step in reforming agricultural price policy to bring about a more efficient allocation of resources After mastering the techniques of single market partial equilibrium analysis which are the book's focus policy analysts can use the techniques to identify when more sophisticated methods such as multi market analysis and computable general equilibrium models are needed to determine what agricultural price policies are right Tsakok begins with graphical analysis and data requirements in order to build intuitive understanding and progresses through steadily more complex techniques demonstrating step by step the calculation of domestic resource costs effective rates of protection and related coefficients of protection Providing a wide range of numerical real world examples to illustrate the practical application of the partial equilibrium framework *Agricultural Price Policy* is an invaluable reference manual and teaching tool
