In Quest of the Stars and Galaxies Theo Koupelis, 2010-02-04 Available with WebAssign Author Theo Koupelis has set the mark for a student friendly accessible introductory astronomy text with *In Quest of the Universe* He has now developed a new text to accommodate those course that focus mainly on stars and galaxies Ideal for the one term course *In Quest of the Stars and Galaxies* opens with material essential to the introductory course gravity light telescopes the sun and then moves on to focus on key material related to stars and galaxies Incorporating the rich pedagogy and vibrant art program that have made his earlier books a success Koupelis *In Quest of the Stars and Galaxies* is the clear choice for students first exploration of the cosmos **Earth Science**

Steven I. Dutch, James Stewart Monroe, Joseph M. Moran, 1998 One of the few texts to integrate earth systems approach with impact of humans on the planet this volume focuses on modern science and how it works This approach gives students the tools they need for critical thinking problem solving and inquiry into the study of geology oceanography and astronomy With everyday observations and examples this text is highly readable and engaging *Readers' Guide to Periodical Literature*, 1915

Earth's Climate Evolution Colin P. Summerhayes, 2015-07-13 To understand climate change today we first need to know how Earth's climate changed over the past 450 million years Finding answers depends upon contributions from a wide range of sciences not just the rock record uncovered by geologists In *Earth's Climate Evolution* Colin Summerhayes analyzes reports and records of past climate change dating back to the late 18th century to uncover key patterns in the climate system The book will transform debate and set the agenda for the next generation of thought about future climate change The book takes a unique approach to the subject providing a description of the greenhouse and icehouse worlds of the past 450 million years since land plants emerged ignoring major earlier glaciations like that of Snowball Earth which occurred around 600 million years ago in a world free of land plants It describes the evolution of thinking in palaeoclimatology and introduces the main players in the field and how their ideas were received and in many cases subsequently modified It records the arguments and discussions about the merits of different ideas along the way It also includes several notes made from the author's own personal involvement in palaeoclimatological and palaeoceanographic studies and from his experience of working alongside several of the major players in these fields in recent years This book will be an invaluable reference for both undergraduate and postgraduate students taking courses in related fields and will also be of interest to historians of science and or geology climatology and oceanography It should also be of interest to the wider scientific and engineering community high school science students policy makers and environmental NGOs Reviews Outstanding in its presentation of the facts and a good read in the way that it intersperses the climate story with the author's own experiences This book puts the climate story into a compelling geological history Dr James Baker The book is written in very clear and concise prose and takes original enlightening and engaging approach to talking about ideas from the perspective of the scientists who promoted them Professor Christopher R Scotese A thrilling ride through continental drift and its consequences Professor

Gerald R North Written in a style and language which can be easily understood by laymen as well as scientists Professor Dr J
rn Thiede What makes this book particularly distinctive is how well it builds in the narrative of change in ideas over time
