Fundamentally Human Contemporary Art and Neuroscience exhibition brought the work of seven contemporary artists to the fore whose work addresses aspects of the neurological sciences. Curated by BFA Fine Arts Department Chair of the School of Visual Arts in New York, Suzanne Anker, the exhibition included works by the artists Suzanne Anker, Andrew Carnie, Rona Pondick, Michael Joaquin Grey, Michael Rees, Frank Gillette, and Leonel Moura. Each interdisciplinary artist essentially employed new technologies ranging from robotics, 3D scanning, Photoshop, rapid prototyping, microscopy, and computational video. All were concerned with the mysteries and unity of nature and its processes, the transmission of knowledge and beliefs, and the reveries of human metaphors of being in time.

Postmodernism and Video Art Liz Kim, 2025-08-22 Liz Kim traces the theories and artistic practices that articulated American experimental video through its key works and events, art critical discourse as well as the politics of its funding and distribution during the 1970s into the 1980s, focusing on New York. This is a historical examination of the relationship between experimental video and postmodernism in the context of the early New York video scene as a foundational crucible of ideas and practices. Video grew out of both the acculturation of television as well as the resistance against its hegemonic forms as it enabled hybrid user-generated content. As such, video became a testing ground for postmodern thought as it sat at the perfect nexus of mass media art and the politics of representation. This book historicizes the theories of video art through the shifts in representations of cultural identities and the changes within its critical and structural supports. Through this process, chapters uncover new roots of postmodernism through historical evidence, widening the scope of the term and its concepts. The book will be of interest to scholars working in art history, film studies, and media studies.

Against Immediacy William Kaizen, 2016-07-05 *Against Immediacy* is a history of early video art considered in relation to television in the United States during the 1960s and 1970s. It examines how artists questioned the ways in which the people were ideologically figured by the commercial mass media. During this time, artists and organizations including Nam June Paik, Juan Downey, and the Women's Video News Service challenged the existing limits of the one-to-many model of televisual broadcasting while simultaneously constructing more democratic, bottom-up models in which the people mediated themselves. Operating at the intersection between art history and media studies, *Against Immediacy* connects early video art and the rise of the media screen in gallery-based art to discussions about participation and the activation of the spectator in art and electronic media, moving from video art as an early form of democratic media practice to its canonization as a form of high art.

A Theory of Computer Semiotics Peter Bøgh Andersen, 1997-04-28. Semiotics is the science of signs: graphical such as pictures, verbal writing or sounds or others such as body gestures and clothes. Computer semiotics studies the special nature of computer-based signs and how they function in use. This 1991 book is based on ten years of empirical research on computer usage in work situations and contains material from a course taught by the author. It introduces basic traditional semiotic concepts and adapts them so that they become useful for analysing and designing computer systems in their symbolic context of work. It presents a novel approach to the subject, rich in examples, in that it is both theoretically systematic and practical. The author refers to and reinterprets techniques already used so that readers can deepen their understanding. In addition, it offers new techniques and a consistent perspective on computer systems that is particularly appropriate for new hardware and software, e.g. hypermedia whose main functions are presentation and communication. This is a highly important work whose influence will be wide and longlasting.

The Oxford Guide to the Uralic Languages Marianne Bakró-Nagy, Johanna Laakso, Elena Skribnik, 2022-03-24. This volume offers the most comprehensive and wide-ranging treatment available today of the Uralic language family, a group of languages spoken in northern Eurasia. While there is a long history of research into these languages, much of it has been conducted within several disparate national traditions; studies of certain languages and topics are somewhat limited and in many cases outdated. *The Oxford Guide to the Uralic Languages* brings together leading scholars and junior researchers to offer a comprehensive and up-to-date account of the internal relations and diversity of the Uralic language family, including the outlines of its historical development and the contacts between Uralic and other languages of Eurasia. The book is divided into three parts. Part I presents the origins and development of the Uralic languages: the initial chapters examine reconstructed Proto-Uralic and its divergence, while later chapters provide surveys of the history and codification of the three Uralic nation-state languages: Hungarian, Finnish, and Estonian, and the Uralic minority languages from Baltic Europe to Siberia. This part also explores questions of endangerment, revitalization, and language policy. The chapters in Part II offer individual structural overviews of the Uralic languages, including a number of understudied minority languages for which no detailed description in English has previously been available. The final part of the book provides cross-Uralic comparative and typological case studies of a range of issues in phonology, morphology, syntax, and the lexicon. The chapters explore a number of topics such as information structure and clause combining that have traditionally

received very little attention in Uralic studies The volume will be an essential reference for students and researchers specializing in the Uralic languages and for typologists and comparative linguists more broadly *The Only Authorized Workbook & Companion to Bob Proctor's Change Your Paradigm, Change Your Life* Proctor Gallagher Institute, 2024-11-26 In his acclaimed book *Change Your Paradigm Change Your Life* best selling author Bob Proctor shows you his proven methods for achieving more than you've ever dreamed of You can break past barriers and mental handicaps in every area of your life money career relationships family even spirituality You can get what you want out of life actually much more than you may think you want now Bob's book with this workbook as a study aid will help you get there This workbook will help you to understand and absorb the transformative ideas of Bob's groundbreaking work It uses exercises questions and quizzes to help you apply these vital teachings to your long term goals and day to day activities By using this workbook in conjunction with Bob's *Change Your Paradigm Change Your Life* you will Discover the hidden mental programs that are keeping you back Free yourself from the negative influences of others Develop the confidence and willpower to achieve your lifelong goals Change every area of your life for excellence satisfaction and joy Replace harmful habits with transformative and beneficial ones Make more money than you've ever dreamed of Set your control system to achieve your desired results Activate the full potential of your spiritual DNA *Change Your Paradigm Change Your Life* is full of ideas that will make you explode with creative and transformative energy But you have to put these ideas into effect This workbook will help you This is the only authorized workbook for Bob Proctor's *Change Your Paradigm Change Your Life* *Review of Marketing 1990* Valarie A.
