*Autocar* , 2005 **Automotive News** , **Sustainable Innovation** Andrew Hargadon, 2015-06-24 If we can carry in our pockets more computing power than the Apollo program needed to put a man on the moon why can t we solve problems like climate change famine or poverty The answer lies in part in the distinctive challenges of creating innovations that address today s pressing environmental and social problems In this groundbreaking book Andrew Hargadon shows why sustainable innovation the development of financially viable products that support a healthy environment and communities is so difficult when compared to creating the next internet ventures or mobile apps that disregard these criteria

While other books treat innovation across sectors equally Hargadon argues that most effective innovation strategies hinge on attention to the context in which they are pursued Instead of relying on a stale set of best practices executives must craft their own strategies based on the particulars of their industries and markets But there are some rules of the road that foster a triple bottom line this book provides a research based framework that outlines the critical capabilities necessary to drive sustainable innovation a long term commitment nexus work science and policy expertise recombinant innovation and robust design Sustainable Innovation draws on a wide range of historical and contemporary examples to show business readers and their companies how to stand on the shoulders of successful pioneers **Crescita** Vaclav Smil,2022-09-21T00:00:00+02:00
