Adult Aphasia Rehabilitation Applied Pragmatics:

Adult Aphasia Rehabilitation George Albyn Davis, M. Jeanne Wilcox, 1985 **Adult Aphasia Rehabilitation** G. Albyn Davis, M. Jeanne Wilcox, 1985-06 **Adult Aphasia Rehabilitation** Gloria Jean L. Wallace, 1996 Contributors look at issues in rehabilitation and management of aphasia discussing neglected areas such as working with individuals in culturally diverse populations and in rural communities as well as stroke prevention and the promotion of wellness Subjects include aphasia classification systems speech language and hearing assessment increasing motivation neuropsychological models of reading and psychological adjustment after a stroke Includes contacts for journals and newsletters associations grant sources and assessment and treatment materials Annotation copyright by Book News Inc Portland OR *Aphasia Rehabilitation* Patrick Coppens, Janet L. Patterson, 2017-01-05 *Aphasia Rehabilitation Challenging Clinical Issues* focuses on specific aphasia symptoms and clinical issues that present challenges for rehabilitation professionals These topics are typically not addressed as separate topics even in clinical texts This heavily clinical text will also include thorough discussions of theoretical underpinnings For chapters that focus on specific clinical challenges practical suggestions to facilitate clinical application and maximize clinical usefulness This resource integrates theoretical and practical information to aid a clinician in planning treatment for individuals with aphasia **Cognitive Neuropsychology and Language Rehabilitation** Anna Basso, Stefano Cappa, Guido Gainotti, 2002-11-21 This volume is mainly based upon contributions presented at a workshop on the relationships between cognitive neuropsychology and aphasia rehabilitation **Aphasia Treatment** Audrey L. Holland and Margaret M. Forbes, 2013-12-01 **The Aphasia Therapy File** Sally Byng, Carole Pound, Kate Swinburn, 2002-09-11 Different from a textbook or academic journal the File represents a collection of explicit descriptions about therapy interventions written by practitioners themselves The description of the rationale for the therapy the intervention itself and evaluation of outcomes are of paramount importance Each contributor guides the reader through the thinking that they engaged in as they decided what to do often with considerable frankness about the difficulties involved The File will be of equal value to experienced practitioners and students alike *Neuropsychology* Dahlia W. Zaidel, 2013-10-22 The field of neuropsychology has grown rapidly in recent years New developments have been of interest across disciplines to cognitive clinical and experimental psychologists as well as neuroscientists Neuropsychology presents a comprehensive overview of where the field stands now relative to all these disciplines Representing the critical areas in human neuropsychology this book begins with the history and development of the field and proceeds to discuss brain structure and function with regard to attention perception emotion language and movement Provides a comprehensive literature review Chapters represent the critical areas in human neuropsychology Organized for ease of use and reference Contributors from medicine experimental cognitive and clinical psychology *Cognitive Approaches in Neuropsychological Rehabilitation* Xavier Seron, Gérard Deloche, 2018-09-03 Originally published in 1989 presenting a new perspective on cognitive therapy in neuropsychology

these papers examine a cognitively oriented single case methodology in neuropsychological rehabilitation The recommended strategy is in depth analysis of the precise nature of the impaired as well as the preserved processing components in the individual patient The objective is to design a therapeutic course based on individual patient needs that is justified by the theoretical interpretation of the location of the deficit in his or her cognitive architecture **Aphasia and Its Therapy**

Anna Basso, 2003-01-09 This is the first single authored book to attempt to bridge the gap between aphasia research and the rehabilitation of patients with this language disorder Studies of the deficits underlying aphasia and the practice of aphasia rehabilitation have often diverged and the relationship between theory and practice in aphasiology is loose The goal of this book is to help close this gap by making explicit the relationship between what is to be rehabilitated and how to rehabilitate it Early chapters cover the history of aphasia and its therapy from Broca's discoveries to the 1970s and provide a description of the classic aphasia syndromes The middle section describes the contribution of cognitive neuropsychology and the treatment models it has inspired It includes discussion of the relationship between the treatment approach and the functional model upon which it is based The final chapters deal with aphasia therapy After providing a sketch of a working theory of aphasia Basso describes intervention procedures for disorders resulting from damage at the lexical and sentence levels as well as a more general conversation based intervention for severe aphasics Anna Basso has run an aphasia rehabilitation unit for more than thirty years In this book she draws on her considerable experience to provide researchers clinicians and their students and trainees in speech language pathology and therapy aphasiology and neuropsychology with comprehensive coverage of the evolution and state of the art of aphasia research and therapy *Context in Communication: A Cognitive View*

Gabriella Airenti, Marco Cruciani, Alessio Plebe, 2017-04-03 Context is what contributes to interpret a communicative act beyond the spoken words It provides information essential to clarify the intentions of a speaker and thus to identify the actual meaning of an utterance A large amount of research in Pragmatics has shown how wide ranging and multifaceted this concept can be Context spans from the preceding words in a conversation to the general knowledge that the interlocutors supposedly share from the perceived environment to features and traits that the participants in a dialogue attribute to each other This last category is also very broad since it includes mental and emotional states together with culturally constructed knowledge such as the reciprocal identification of social roles and positions The assumption of a cognitive point of view brings to the foreground a number of new questions regarding how information about the context is organized in the mind and how this kind of knowledge is used in specific communicative situations A related very important question concerns the role played in this process by theory of mind abilities ToM both in typical and atypical populations In this Research Topic we bring together articles that address different aspects of context analysis from theoretical and empirical perspectives integrating knowledge and methods derived from Philosophy of language Linguistics Cognitive Science Cognitive Neuroscience Developmental and Clinical Psychology **Aphasia and Related Neurogenic Communication Disorders**

Ilias Papathanasiou, Patrick Coppens, 2016-02-11 *Aphasia and Related Neurogenic Communication Disorders* Second Edition reviews the definition terminology classification symptoms and neurology of aphasia including the theories of plasticity and recovery Best practices of aphasia assessment and intervention are presented including neuropsychological models and formal and informal testing procedures to maximize correct clinical rehabilitative decisions Theoretical bases for rehabilitation guidelines for organization and delivery of evidence based therapy as well as augmentative and alternative communication therapy and computer based treatments are also presented **Milestones in the History of Aphasia**

Juergen Tesak, Chris Code, 2008-02-28 This book surveys the history of aphasia from the earliest mentions of speech and language impairments in ancient times medieval attempts to understand aphasia through to the development of modern cognitive neuroscience SPPARC Sarah Lock, Ray Wilkinson, Karen Bryan, 2020-11-25 SPPARC highlights the importance of working with partners in order to create real life change both for partners and for people with aphasia The SPPARC pack consists of a manual downloadable resources and provides practical resources to run support and conversation training programmes either for groups of partners or for the partner and the person with aphasia together as a couple conversation assessment and treatment materials photocopyable and printable from the downloadable resources activities and handouts as well as an introduction to conversational analysis and downloadable resources with 27 extracts of everyday conversations between several people with aphasia and their partners which can be used as a resource both for assessing everyday conversation and for facilitating change Theoretically validated through the Coping with Communicating research project from University College London SPPARC goes beyond the theory and provides a complete resource of clinically effective tools to work with people with aphasia and their communication partners **Cognitive Neurorehabilitation** Donald T.

Stuss, Gordon Winocur, Ian H. Robertson, 2010-05-06 Now available in paperback this updated new edition summarizes the latest developments in cognitive neuroscience related to rehabilitation reviews the principles of successful interventions and synthesizes new findings about the rehabilitation of cognitive changes in a variety of populations With greatly expanded sections on treatment and the role of imaging it provides a comprehensive reference for those interested in the science as well as including the most up to date information for the practising clinician It provides clear and practical guidance on why cognitive rehabilitation may or may not work How to use imaging methods to evaluate the efficacy of interventions What personal and external factors impact rehabilitation success How biological and psychopharmacological changes can be understood and treated How to treat different disorders of language and memory and where the field is going in research and clinical application The Handbook of Language and Speech Disorders Nicole Müller, 2012-09-17 The Handbook of Speech and Language Disorders presents a comprehensive survey of the latest research in communication disorders Contributions from leading experts explore current issues landmark studies and the main topics in the field and include relevant information on analytical methods and assessment A series of foundational chapters covers a variety of important

general principles irrespective of specific disorders These chapters focus on such topics as classification diversity considerations intelligibility the impact of genetic syndromes and principles of assessment and intervention Other chapters cover a wide range of language speech and cognitive intellectual disorders Socially Situated? Effects of Social and Cultural Context on Language Processing and Learning Pia Knoefeler, Ramesh Kumar Mishra, Marcela Pena, 2022-04-25

Concise Encyclopedia of Brain and Language Harry A. Whitaker, 2010-04-08 This volume describes in up to date terminology and authoritative interpretation the field of neurolinguistics the science concerned with the neural mechanisms underlying the comprehension production and abstract knowledge of spoken signed or written language An edited anthology of 165 articles from the award winning Encyclopedia of Language and Linguistics 2nd edition Encyclopedia of Neuroscience 4th Edition and Encyclopedia of the Neurological Sciences and Neurological Disorders it provides the most comprehensive one volume reference solution for scientists working with language and the brain ever published Authoritative review of this dynamic field placed in an interdisciplinary context Approximately 165 articles by leaders in the field Compact and affordable single volume format **Discourse Analysis and Applications** Ronald L. Bloom, Loraine K. Obler, Susan De Santi, Jonathan S. Ehrlich, 2013-06-17 Application of analytic discourse techniques to clinical practice is relatively recent This book's contributors begin with the notion that systematic examination of discourse provides a rich source of data for describing the complex relationships among language social context and the cognitive processes that underlie discourse comprehension and production Evidence is provided that when discourse is studied across different clinical populations analysis yields an optimal opportunity for developing dynamic models of brain and language that more thoroughly account for the complexity of language use in social contexts Accordingly studies presented in this volume have a dual focus to examine the implications of discourse research on neurolinguistic theories and to evaluate the contribution of discourse analysis to understanding the clinical status of patients with brain damage As such this volume reports patterns of preserved and impaired discourse behavior in normal adults and in different adult clinical populations It also describes numerous tasks designed to elicit a variety of discourse genres and a host of techniques created to describe how subjects order information and relate ideas across sentences In addition it includes numerous abstract units and linguistic devices targeted to examine those aspects of discourse that govern cohesion organization and topic manipulation This volume is unique because it presents both theoretical and clinical papers that examine a variety of communication pathologies Clinicians often report dissatisfaction with formal test batteries in that results are often at variance with clinical observation of performance in real life situations To address this concern this work proposes methods for examining discourse that move the examiner closer to naturalistic sampling The research presented demonstrates that discourse analysis provides clinically significant information that contributes to the understanding of the cognitive linguistic and social status of people with communication disorders These studies also offer a framework to support continuously evolving diagnostic and treatment paradigms for adults with
