Christians from illiterate peasants to learned intellectuals moved out to the wastelands beyond the Nile Valley and in the famous words of Saint Athanasius made the desert a city. In so doing they captured the imagination of the ancient world. They forged techniques of prayer and asceticism of discipleship and spiritual direction that have remained central to Christianity ever since. Seeking to map the soul's long journey to God and plot out the subtle vagaries of the human heart they created and inspired texts that became classics of Western spirituality. These Desert Christians were also brilliant storytellers some of Christianity's finest. This book introduces the literature of early monasticism. It examines all the best known works including Athanasius' *Life of Antony*, the *Lives of Pachomius* and the so called *Sayings of the Desert Fathers*. Later chapters focus on two pioneers of monastic theology: Evagrius Ponticus the first great theoretician of Christian mysticism and John Cassian who brought Egyptian monasticism to the Latin West. Along the way readers are introduced to path breaking discoveries to new texts and recent archeological finds that have revolutionized contemporary scholarship on monastic origins. Included are fascinating snippets from papyri and from little known Coptic Syriac and Ethiopic texts. Interspersed in each chapter are illustrations maps and diagrams that help readers sort through the key texts and the richly textured world of early monasticism. Geared to a wide audience and written in clear jargon free prose *Desert Christians* offers the most comprehensive and accessible introduction to early monasticism.

[Urban Theory and the Urban Experience](#) Simon Parker, 2015-04-24

Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies and the often unacknowledged debt that empirical and theoretical perspectives on the city owe one another. From the foundations of modern urban theory in the work of Weber Simmel Benjamin and Lefebvre to the writings of contemporary urban theorists such as David Harvey and Manuel Castells and the Los Angeles school of urbanism *Urban Theory and the Urban Experience* traces the key developments in the idea of the city over more than a century. Individual chapters explore investigative studies of the great metropolis from Charles Booth to the contemporary urban research of William J Wilson along with alternative approaches to the industrial city ranging from the Garden City Movement to the new urbanism. The volume also considers the impact of new information and communication technologies and the growing trend towards disaggregated urban networks all of which raise important questions about viability and physical and social identity of the conventional townscape. *Urban Theory and the Urban Experience* concludes with a rallying cry for a more holistic and integrated approach to the urban question in theory and in practice if the rich potent. For the benefit of students and tutors frequent question points encourage exploration of key themes and annotated further readings provide follow up sources for the issues raised in each chapter. The book will be of interest to students scholars practitioners and all those who wish to learn more about why the urban has become the dominant social economic and cultural form of the twenty first century.
