Elementary Mathematics Curriculum Materials Janine T. Remillard,Ok-Kyeong Kim,2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors Supporting English Language Learners in Math Class, Grades 3-5 Rusty Bresser,Kathy Melanese,Christine Sphar,2008 An interactive resource designed to help schools implement effective instructional practices that create sustainable results for English language learners These research based materials assist educators with simultaneously developing students mastery of mathematics and their academic language development from package *Sfaw Math Grade 1 Student Edition* Randall Inners Charles,1997-05-22 Basic math practice approximately grade 2 *Mathematics & Science in the Real World* ,2000 *Educational Technology* United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Technology and Competitiveness,1991 This hearing on computer assisted instruction and the use of educational technology in classrooms was held in response to a presidential request that instructional innovation be given special attention particularly in science and mathematics education in every congressional district This transcript of the hearing includes statements presented by the following witnesses 1 Walter E Massey Director National Science Foundation 2 Educational Technology Computer Based Instruction David T Kearns Deputy Secretary Department of Education 3 Educational Technology New Tools for Teaching and Learning Linda G Roberts Senior Associate Science Education and Transportation Program Office of Technology
