Adjectives And Comparison In English A Semantic Study:

Adjectives and Comparison in English Jan Rusiecki,1985 *English Adjective Comparison* Victorina González-Díaz,2008

The present work contributes to a better understanding of the English system of degree by means of a study of a number of aspects in the evolution of adjective comparison that have so far either been considered controversial or not been counted for at all As will be shown the diachronic aspects analysed will also have synchronic implications Furthermore unlike previous synchronic as well as diachronic accounts of adjective comparison this monograph does not concentrate on the standard comparative strategies i e inflectional and periphrastic forms only but also deals with double periphrastic comparatives thus providing an analysis of the whole range of comparative structures in English *An Open Dimension of Meaning: A Semantic Study of Adjectives and Their Combinations* Jesús Gerardo Martínez del Castillo,1997-01-01 Adjectives are lexematic words functioning at the three levels of linguistic competence They form a category they belong to particular languages and they are elements of free use by speakers As virtual they belong to the system of the language as instruments of expression they belong to the norm of the language and as instruments of communication they belong to discourse At the same time adjectives are predicates the expression of a state of affairs provided with the instruments of relation and combination in a sentence or in a phrase This study analyses the potentialities of expression and interpretation of adjectives

Projecting the Adjective Christopher Kennedy,2013-02-01 First Published in 1999 The main argument presented in this volume is that gradable adjectives like bright dense and short denote measure functions functions from objects to abstract representations of measurement or scales and degrees This proposal is shown to provide a foundation for principled explanations of a wide range of syntactic and semantic properties of gradable adjectives and the constructions in which they appear ranging from the syntactic distribution of gradable adjectives to the scopal characteristics of comparatives and the empirical effects of adjectival polarity Adjectives and Comparison in English Jan Rusiecki,1985 **Contrast,**

Linguistics 2006 Richard Dury, Maurizio Gotti, Marina Dossena, 2008-07-09 The papers collected in this volume were first presented at the 14th International Conference on English Historical Linguistics Bergamo 2006 Alongside studies of syntax morphology and dialectology published in two sister volumes many innovative contributions focused on semantics pragmatics and register variation A rich variety of state of the art studies and plenary lectures by acknowledged world experts in the field bears witness to the quality of the scholarly interest in this field of research In all the contributions well established methods combine with new theoretical approaches in an attempt to shed more light on phenomena that have hitherto remained unexplored or have only just begun to be investigated The accurate peer reviewed selection ensures the methodological homogeneity of the papers

Semantik / Semantics Arnim von Stechow, Dieter Wunderlich, 2008-07-14 During the past 20 years the investigation into meaning of natural languages has emerged into one of the most active disciplines in theoretical linguistics The different traditions of linguistics philosophy of language and philosophical logic converged in the paradigm of truth conditional semantics which now plays a central role in the cognitive sciences From empirical research in particular languages more principal questions arise of how the speaker succeeds in expressing particular types of meaning by use of formal combination of signs The theories developed to cope with the question assume that for a hearer the meaning of a complex expression must be computable and therefore modern theoretical semantics uses formal algebraic methods to construct the meaning compositionally in view of syntactic structure Furthermore meaning need to be anchored in the experience available to hearer In order to deal with this theoretical semantics extensively uses the concept of truth conditions which roughly explain how a world must be structured in order to be matched by certain linguistic expressions Semantic analyses are complemented by context theory and the theory of speech acts Thus linguistic meaning must be related to human cognitive capacities and therefore theoretical semantics is tightly connected with philosophical logic as well as cognitive sciences in general The aim of this handbook is to represent the body of theoretical knowledge which has evolved in the international research of the last two decades Some of the theories can now be termed classical in that they belong to the commonly accepted base of theoretical semantics Other theories are still disputed and there are problems still to be solved as normal in a more developed science The authors who are leading experts in the field of semantics try to balance the accepted and the questionable results It goes without saying that each author holds a particular position in this respect Some articles are written in English some in German Since semantics is considered to be a subfield of linguistics the articles are arranged due to linguistic points of view In the first 5 chapters comprising 15 articles the common principles of semantics are presented ontological foundations of semantics composition of meaning problems of use context speech acts and lexical base of meaning The next 5 chapters comprising 25

articles are concerned with semantic phenomena theories and problems which are specific for a particular class of linguistic expressions These are arranged according to parts of speech nouns functional categories verbs adjectives and so on This division does not reflect a theoretical position by itself however it allows one to recognize problems connected with one another Some more general questions are discussed in more than one article in different perspective and vicinity The Handbook is complemented by a service article on formal methods in semantics followed by a comprehensive bibliography including about 1700 entries and both a subject and a name index This handbook is indispensable for all research in linguistics and neighboring disciplines philosophy of language cognitive sciences Some of the articles can serve as basic literature for classes of advanced students

A Notional Theory of Syntactic Categories John Mathieson Anderson, 1997-04-28 This book presents an innovative theory of syntactic categories and the lexical classes they define It revives the traditional idea that these are to be distinguished notionally semantically The author proposes a notation based on semantic features which accounts for the syntactic behaviour of classes The book also presents a case for considering this classification SH again in rather traditional vein SH to be basic to determining the syntactic structure of sentences

with Stein and Wright's 1995 edition publications on the specific process have broadened the scope of this research. Indeed the question how far have we come addressed in the introduction has become central in reaching a clearer understanding of the above framework and even expanding it. Individual papers explore not only wider questions and implications on the theoretical status of subjectivity and subjectification in language but are empirically supported by thorough and extensive data from different languages: Asian languages, German, Spanish, Greek, Dutch, English. These studies of particular areas of grammar: modals, adjectives or of levels of analysis: syntax can help implement or adapt the existing accounts of subjectivity made in the literature. The challenge for every single paper is to show whether the two major approaches: Langacker's and Traugott's can possibly be integrated or whether they are fundamentally different. The papers also investigate into the questions whether we have a continuum from highly subjective to more objective, whether subjective need be opposed to objective or whether subjective may also be understood in contrast to neutral which is often the case in Traugott's examples of grammaticalization. Furthermore the issue of intersubjectivity i.e. putting the addressee's perspective onstage is also discussed.
