Adolescent Parenthood Max Sugar,2012-12-06 The definition of the risks of adolescent childbearing has received considerable investigative attention during the last decade We have gradually moved away from simplistically studying young maternal age as the sole determinant of biologic and psychosocial outcome even though we recognize it is one of several factors which warrant consideration We now recognize that if adolescents receive adequate and consistent pre natal care they and their infants should do nearly as well as adult women and their infants of similar backgrounds Thus the major morbidities for adolescent mothers adolescent fathers and their infants are psychosocial lack of educational and vocational futures failed marriages and dependence on government aid for support The adequacy of the parenting of adolescent mothers and fathers and the long term developmental and physical outcomes of their children are largely unstudied This book edited by Dr Max Sugar a recognized authority on adolescence focuses on the important topic of adolescent parenthood The authors of this timely contribution approach the topic of adolescent parenthood in a unique fashion utilizing a combination of several approaches consideration of fictional characters in history astute and carefully conceptualized clinical observations reviews of the literature and their own investigation It will be through the use of such a creative approach that we shall define the important questions which should be addressed about adolescents as parents and the outcome for their children

The Dynamics Of Race And Gender

Haleh Afshar,Mary Maynard,2012-10-12 During the past decade feminism and women s studies have been forced to acknowledge the diversities of women s experiences as well as the patriarchal oppression that they share The emphasis on difference has shattered the illusion of homogeneity and sisterhood which previously characterized white middle class Westernized feminist politics and analysis There is relatively little work which concentrates on the inter relationships of race and gender in general and the consequences of racism for women of different backgrounds in particular The Dynamics of Race and Gender aims to contribute to the debate and

understanding in this area Emphasis has been given to age class disability race and sexuality The contributors to this volume are from different religious cultural and ethnic backgrounds giving a balanced and broad ranging perspective on this important social question Organized around three main themes which are issues of theory and method questions of identity racism and sexism at work the chapters of this book indicate how the processes of race and gender interrelate in highly complex and contradictory ways Demonstrating the benefits to be gained from analysing the interplay of various axes of differentiation in specific empirical and historical locations and in doing so under scoring the point that diversity among women cannot be seen as a static phenomenon Communication, Intimacy, and Close Relationships Valerian J.

Derlega,2013-10-02 Communication Intimacy and Close Relationships offers an account of the nature of intimate relationships and their effects on people s self concepts The development and maintenance of intimate relationships are examined along with people s motives and goals in pursuing intimacy the nature of social exchanges in intimate relationships and the consequences for individuals who find themselves socially isolated The critical role of communication in intimate relationships is given emphasis Comprised of seven chapters this book begins with a discussion on the role of self disclosure in intimate relationships as well as the risks that individuals incur when they self disclose The next chapter presents a cognitive interaction model of the nature of intimacy and intimate relationships within the context of cognitive social learning theory and a systems theory approach to communication The effect of people s motives on relationships is then considered together with the role of two fundamental human motives power and intimacy on love and friendship The remaining chapters focus on the importance of the identification process that is how people fix their own and others identities in social interaction in developing relationships patterns of nonverbal exchange in close relationships how and why loneliness occurs and the nature of social exchange processes in intimate relationships The book concludes with an epilogue that provides a perspective on why people may find it difficult or easy to form intimate relationships This monograph should be a valuable resource for psychologists and sociologists *An Introduction to the Collected Works of C. G. Jung* Clifford

Mayes,2016-03-24 An Introduction to the Collected Works of C G Jung Psyche as Spirit offers a concise and engaging overview of Jung s work and contributions to the field of psychology Mayes first examines Jung s philosophical influences as well as his work and eventual break with Sigmund Freud providing insights into how these experiences shaped Jung s theory Mayes brings into focus the major concepts and themes explored in Carl Gustav Jung s Collected Works including the ego Self Axis archetypes personality types and the Collective Unconscious presenting a thorough introduction and a valuable resource for both Jungian students as well as Jungian scholars **Social Support: Theory, Research and Applications**

I.G. Sarason,2013-11-11 No one is rich enough to do without a neighbor Traditional Danish Proverb This bit of Danish folk wisdom expresses an idea underlying much of the current thinking about social support While the clinical literature has for a long time recognized the deleterious effects of unwholesome social relationships only more recently has the focus broadened

to include the positive side of social interaction those interpersonal ties that are desired rewarding and protective This book contains theoretical and research contributions by a group of scholars who are charting this side of the social spectrum Evidence is increasing that maladaptive ways of thinking and behaving occur disproportionately among people with few social supports Rather than sapping self reliance strong ties with others particularly family members seem to encourage it Reliance on others and self reliance are not only compatible but complementary to one another While the mechanism by which an intimate relationship is protective has yet to be worked out the following factors seem to be involved intimacy social integration through shared concerns reassurance of worth the opportunity to be nurtured by others a sense of reliable alliance and guidance The major advance that is taking place in the literature on social support is that reliance is being placed less on anecdotal and clinical evidence and more on empirical inquiry The chapters of this book reflect this important development and identify the frontiers that are currently being explored
