Informatica Alex Wright, 2023-06-15 Informatica the updated edition of Alex Wright's previously published *Glut* continues the journey through the history of the information age to show how information systems emerge Today's information explosion may seem like a modern phenomenon but we are not the first generation or even the first species to wrestle with the problem of information overload Long before the advent of computers human beings were collecting storing and organizing information from Ice Age taxonomies to Sumerian archives Greek libraries to Christian monasteries Wright weaves a narrative that connects such seemingly far flung topics as insect colonies Stone Age jewelry medieval monasteries Renaissance encyclopedias early computer networks and the World Wide Web He

suggests that the future of the information age may lie deep in our cultural past We stand at a precipice struggling to cope with a tsunami of data Wright provides some much needed historical perspective We can understand the predicament of information overload not just as the result of technological change but as the latest chapter in an ancient story that we are only beginning to understand

Animal Encounters Susan Crane, 2012-11-29 Traces of the living animal run across the entire corpus of medieval writing and reveal how pervasively animals mattered in medieval thought and practice In fascinating scenes of cross species encounters a raven offers St Cuthbert a lump of lard that waterproofs his visitors boots for a whole year a scholar finds inspiration for his studies in his cat s perfect focus on killing mice and a dispossessed knight wins back his heritage only to give it up again in order to save the life of his warhorse Readers have often taken such encounters to be merely figurative or fanciful but Susan Crane discovers that these scenes of interaction are firmly grounded in the intimate cohabitation with animals that characterized every medieval milieu from palace to village The animal encounters of medieval literature reveal their full meaning only when we recover the living animal s place within the written animal The grip of a certain humanism was strong in medieval Britain as it is today the humanism that conceives animals in diametrical opposition to humankind Yet medieval writing was far from univocal in this regard Latin and vernacular works abound in other ways of thinking about animals that invite the saint the scholar and the knight to explore how bodies and minds interpenetrate across species lines Crane brings these other ways of thinking to light in her readings of the beast fable the hunting treatise the saint s life the bestiary and other genres Her substantial contribution to the field of animal studies investigates how animals and people interact in culture making how conceiving the animal is integral to conceiving the human and how cross species encounters transform both their animal and their human participants
