

Important information for the use of biodegradable oil

- Use only the biodegradable hydraulic fluids which have been tested and approved by Wacker Neuson GmbH. Always contact Wacker Neuson GmbH for the use of other products which have not been recommended. In addition, ask the oil supplier for a written declaration of guarantee. This guarantee is applicable to damage occurring on the hydraulic components, which can be proven to be due to the hydraulic fluid.
- Use only biodegradable oil of the same type for filling up. In order to avoid mixture-standings, a label providing clear information is located on the hydraulic oil can pasted to the filler (check) regarding the type of oil currently used!
The joint use of two different biodegradable oils can affect the quality of one of the oil types. Therefore, make sure the remaining amount of initial hydraulic fluid in the hydraulic system does not exceed 0.5 % when changing biodegradable oil (manufacturer's indications).
- Do not fill up with mineral oil – the content of mineral oil should not exceed 2 % in order to avoid burning problems and to ensure biological degradability.
- When running the machine with biodegradable oil, the same oil and filter replacement intervals are valid as for mineral oil – see [Chapter 5.14 Maintenance plan 2000](#) [www.wn.com](#) on page 5.17.
- Always have the contamination water in the hydraulic oil can drained by an authorized workshop before the cold season. The water content may not exceed 0.1 % by weight.
- The instructions in this *Operator's Manual* concerning environmental protection are also valid for the use of biodegradable oil.
- If additional hydraulic attachments are mounted or operated, use the same type of biodegradable oil for these attachments to avoid mixtures in the hydraulic system.

Subsequent change from mineral oil to biodegradable oil must be carried out by an authorized workshop or to your Wacker Neuson partner.

Checking hydraulic pressure lines
Specify safety instructions

Danger!

Caution when checking hydraulic lines, especially when searching for leaks. Hydraulic oil escaping under high pressure can penetrate the skin and cause serious injuries.

Danger of personal injury!

- Always consult a doctor immediately, even if the wound seems insignificant – otherwise serious infections could set in!
- Always observe the following instructions:
 - Disengage loading, remove fittings and hose connections only when the system is not under pressure. i.e. release the pressure before working on pressurized lines!
 - Never walk or run on damaged or leaking pressure lines and hose connections. Replace damaged parts with new ones!
 - Never search for leaks with your bare hands, but wear protective gloves!
 - Use paper or wood to check for minor leaks. Never use an unprotected light or naked flame!
 - Have damaged flexible lines replaced by authorized workshops only!

- Cracks and damaged pressure lines must be immediately repaired or replaced by an authorized workshop or other skilled staff.
This not only increases the operating safety of your machine but also helps to protect the environment.
- Replace hydraulic hoses every 6 years from the date of manufacture, even if they do not seem to be damaged.

In this regard, we recommend that you observe all the relevant safety regulations for hydraulic lines, as well as the safety regulations regarding accident prevention and occupational health and safety in your country. Also observe [DIN 20685](#), part 1.

Astrobiology: Future Perspectives P. Ehrenfreund, W.M. Irvine, T. Owen, Luann Becker, Jen Blank, J.R. Brucato, Luigi Colangeli, Sylvie Derenne, Anne Dutrey, Didier Despois, Antonio Lazcano, Francois Robert, 2006-03-05 Astrobiology a new exciting interdisciplinary research field seeks to unravel the origin and evolution of life wherever it might exist in the Universe. The current view of the origin of life on Earth is that it is strongly connected to the origin and evolution of our planet and indeed of the Universe as a whole. We are fortunate to be living in an era where centuries of speculation about the two ancient and fundamental problems the origin of life and its prevalence in the Universe are being replaced by experimental science. The subject of Astrobiology can be approached from many different perspectives. This book is focused on abiogenic organic matter from the viewpoint of astronomy and planetary science and considers its potential relevance to the origins of life on Earth and elsewhere. Guided by the review papers in this book the concluding chapter aims to identify key questions to motivate future research and stimulate astrobiological applications of current and future research facilities and space missions. Today's rich array of new spacecraft telescopes and dedicated scientists promises a steady flow of discoveries and insights that will ultimately lead us to the answers we seek.

New Views of the Moon Bradley L. Jolliff, Mark A. Wieczorek, Charles K. Shearer, Clive R. Neal, 2018-12-17 Volume 60 of Reviews in Mineralogy and Geochemistry assesses the current state of knowledge of lunar geoscience given the data sets provided by missions of the 1990s and lists remaining key questions as well as new ones for future exploration to address. It documents how a planet or moon other than the world on which we live can be studied and understood in light of integrated suites of specific kinds of information. The Moon is the only body other than Earth for which we have material samples of known geologic context for study. This volume seeks to show how the different kinds of information gained about the Moon relate to each other and also to learn from this experience thus allowing more efficient planning for the exploration of other worlds.
