CORPORATION, 394 MICH 466 (1975) ,1975 55072 GAO Review ,1985 Corporate Culture and Performance John P. Kotter,2008-06-30 Going far beyond previous empirical work John Kotter and James Heskett provide the first comprehensive critical analysis of how the culture of a corporation powerfully influences its economic performance for better or for worse Through painstaking research at such firms as Hewlett Packard Xerox ICI Nissan and First Chicago as well as a quantitative study of the relationship between culture and performance in more than 200 companies the authors describe how shared values and unwritten rules can profoundly enhance economic success or conversely lead to failure to adapt to changing markets and environments With penetrating insight Kotter and Heskett trace the roots of both healthy and unhealthy cultures demonstrating how easily the latter emerge especially in firms which have experienced much past success Challenging the widely held belief that strong corporate cultures create excellent business performance Kotter and Heskett

show that while many shared values and institutionalized practices can promote good performances in some instances those cultures can also be characterized by arrogance inward focus and bureaucracy features that undermine an organization's ability to adapt to change. They also show that even contextually or strategically appropriate cultures ones that fit a firm's strategy and business context will not promote excellent performance over long periods of time unless they facilitate the adoption of strategies and practices that continuously respond to changing markets and new competitive environments. Fundamental to the process of reversing unhealthy cultures and making them more adaptive the authors assert is effective leadership. At the heart of this groundbreaking book Kotter and Heskett describe how executives in ten corporations established new visions aligned and motivated their managers to provide leadership to serve their customers employees and stockholders and thus created more externally focused and responsive cultures.
