Architects Of Hyperspace:

The Architects of Hyperspace Thomas R. McDonough, 1987 A splendid book
Surfing through Hyperspace Clifford A. Pickover, 1999-09-23 Do a little armchair time travel rub elbows with a four dimensional intelligent life form or stretch your mind to the furthest corner of an uncharted universe With this astonishing guidebook Surfing Through Hyperspace you need not be a mathematician or an astrophysicist to explore the all but unfathomable concepts of hyperspace and higher dimensional geometry No subject in mathematics has intrigued both children and adults as much as the idea of a fourth dimension Philosophers and parapsychologists have meditated on this mysterious space that no one can point to but may be all around us Yet this extra dimension has a very real practical value to mathematicians and physicists who use it every day in their calculations In the tradition of Flatland and with an infectious enthusiasm Clifford Pickover tackles the problems inherent in our 3 D brains trying to visualize a 4 D world muses on the religious implications of the existence of higher dimensional consciousness and urges all curious readers to venture into the unexplored territory lying beyond the prison of the obvious Pickover alternates sections that explain the science of hyperspace with sections that dramatize mind expanding concepts through a fictional dialogue between two futuristic FBI agents who dabble in the fourth dimension as a matter of national security This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers Surfing Through Hyperspace concludes with a number of puzzles computer experiments and formulas for further exploration inviting readers to extend their minds across this inexhaustibly intriguing scientific terrain
Are We Alone in the Cosmos? The Search for Alien Contact in the New Millenium Ben Bova, Byron Preiss, 2010-07-15 Are we alone in this cosmos or do we yet have to come to terms with the actual existence of alien life Never before has so much time and concentrated effort been spent by so many scientists and writers in the pursuit of the answer to this fundamental question In this extraordinary book major scientists involved in the search for extraterrestrial intelligence known as SETI explain their work and reveal their secret thoughts Now in joining them here are some of the best speculative thinkers from Arthur C Clarke and Isaac Asimov to Gregory Benford who address the major philosophical questions involved Intriguing suspense filled and intense this book promises to deliver more than just mundane facts and theory

Building Libraries for the 21st Century T.D. Webb, 2012-11-30 Despite calls for electronic virtual digital libraries without walls the walled variety are still being built some of them massive This book explores the reasons for this contradiction by examining several notable new library facilities around the world to see how modern expectations for libraries are being translated into concrete and steel More and more libraries are looking at change not as a dreaded hazard but as an opportunity that can itself be seized to strengthen the library in the areas of mission technologies facilities funding and organizational structure Thirteen libraries are discussed by a librarian or administrator who worked on the project Each author writes about the design and building concerns that were particularly relevant to that library philosophy political issues or any other concerns that affected planning building and services in the new facility Introductory and concluding chapters identify underlying values and themes tying everything together The unique combinations of issues constraints and opportunities show how libraries are planning to fit into the approaching era of virtual information delivery

Interior Urbanism Charles Rice, 2016-02-25 Vast interior spaces have become ubiquitous in the contemporary city The soaring atriums and concourses of mega hotels shopping malls and transport interchanges define an increasingly normal experience of being inside in a city Yet such spaces are also subject to intense criticism and claims that they can destroy the quality of a city's authentic life on the outside Interior Urbanism explores the roots of this contemporary tension between inside and outside identifying and analysing the concept of interior urbanism and tracing its history back to the works of John Portman and Associates in 1960s and 70s America Portman increasingly recognised as an influential yet understudied figure was responsible for projects such as Peachtree Center in Atlanta and the Los Angeles Bonaventure Hotel developments that employed vast internal atriums to define a world of possibilities not just for hotels and commercial spaces but for the future of the American downtown amid the upheavals of the 1960s and 70s The book analyses Portman's architecture in order to reconsider major contexts of debate in architecture and urbanism in this period including the massive expansion of a commercial imperative in architecture shifts in the governance and development of cities amid social and economic instability the rise of postmodernism and critical

urban studies and the defence of the street and public space amid the continual upheavals of urban development In this way the book reconsiders the American city at a crucial time in its development identifying lessons for how we consider the forces at work and the spaces produced in cities in the present
