Architecture For Worship:

Architecture for Worship E. A. Sovik, 1973 Sacred Power, Sacred Space Jeanne Halgren Kilde, 2008 The author's main concern in this book is the dynamic character of Christianity and how church buildings shape and influence the religion. She argues that a primary function of church buildings is to represent and reify three different types of power: divine power, personal empowerment, and social power. Built of Living Stones, 2000 In every church building, art and architecture become the joint work of the Holy Spirit and the local community in preparing a place to receive God's Word and to enter more fully into communion with him. In this volume, the bishops offer instruction on how to design places of worship that are dignified, beautiful, and suited to sacred celebrations. *When Church Became Theatre* Jeanne Halgren Kilde, 2002 This text focuses on the shift in evangelical Protestant architecture in the 1880s and links it to changes in worship style and religious mission. It focuses on how these buildings helped congregations negotiate social and personal power. **Houses of Worship** Jeffery W. Howe, 2003 A guidebook to the architectural styles of American churches and temples. *Houses of Worship* is highly illustrated with color photographs and explanatory line drawings. A survey of American religious architecture, this book is a history of the development of American religious architecture, a guidebook to assist in the identification of the style of individual buildings based on historical examples of typical buildings, and a travel guide to regional monuments of interesting architecture. **An Architecture of Immanence** Mark A. Torgerson, 2007-01-22 Torgerson begins by discussing God's transcendence and immanence and showing how church architecture has traditionally interpreted these key concepts. He then traces the theological roots of immanence's priority from liberal theology and liturgical innovation to modern architecture. Next, Torgerson illustrates this new architecture of immanence through particular practitioners, focusing especially on the work of theologically savvy architect Edward Anders Svik. Finally, he addresses the future of church architecture as congregations are buffeted by the twin forces of liturgical change and postmodernism. **Houses of God** Michael J. Crosbie, 2006 The subject of architecture for religion continues to fascinate. *Houses of God: Religious Architecture for a New Millennium* by noted author and architect Michael J. Crosbie demonstrates an inspiring array of gathering places for worship collected from the USA and abroad. These projects, illustrated with superb photography and detailed plans, demonstrate how architects and congregations can work together to build places that satisfy often complex cultural and personal needs. There are churches, synagogues, and temples by some of the world's leading architects, including Tadao Ando, Architect and Associates, Heinz Tesar, Gould Evans, and many others. AUTHOR Michael J. Crosbie is an architect, author, journalist, and teacher. He is the author of numerous books on architecture and has written for a number of journals and magazines. He is currently the assistant editor at *Faith and Form*. He teaches architecture at Roger Williams University and has lectured at architecture schools in North America and abroad. SELLING POINTS Third title in the IMAGES series, this religious architecture series has a captive and loyal returning audience around the world. New layout and design. Superb colour.

Vosko, 2019-09-26 A deep strain of tribal politics is dividing societies around the globe Organized religions are also coping with scandals disappointments and polarizing ideologies The history of Christianity reveals that such frictions deeply wound the church Fr Richard S Vosko recognizes that liturgical buildings are metaphorical expressions of the people of God He proposes in a relational way that when all physical and psychological boundaries in a place of worship are removed people will discover a common ground Building on theological foundations and design principles Vosko envisions what an egalitarian servant church can look like In a bold but thoughtful manner he presents progressive insights into the fields of church art and architecture

White, 2003-02-28 Each year a billion dollars is spent on church buildings in the United States Yet there is no authoritative book available to guide building committees ministers and others responsible for new churches in the theological implications of their work Dr White explores the theological and historical considerations relevant to building for Protestant worship Surprisingly these are often ignored by building committees usually with disastrous results His approach is highly original especially in his theological treatment of worship yet his book is also a operative in the largest sense in that it relates theology to practice Professor White begins with a critical analysis of contemporary concepts of Protestant worship and then defines the liturgical factors in church design Following this there are four chapters giving an historical account of various experiments from the third century to the present This section indicates the tremendous variety of possibilities open

to the church builder many of which have been ignored too long A final chapter deals with emotive factors all vitally relevant to the architect choir liturgical art and style The opportunity to design a new church building occurs only once or twice in each generation of church members It is all the more important that it be done carefully since the building will continue to affect the life of the congregation for many years Until fundamental questions as to what the Church is and what the Church does in worship are raised a congregation is not prepared to build This book will help churches find the answers The 155 item bibliography should be of value to many since a recent extensive bibliography on Protestant church architecture does not exist This book also contains 60 diagrams of experiments in plan garnered from nearly 2000 years of history
