Reflections on Architecture, Society and Politics Graham Cairns,2016-10-04 Reflections on Architecture Society and Politics brings together a series of thirteen interview articles by Graham Cairns in collaboration with some of the most prominent polemic thinkers and critical practitioners from the fields of architecture and the social sciences including Noam Chomsky Peggy Deamer Robert A M Stern Daniel Libeskind and Kenneth Frampton Each chapter explores the relationship between architecture and socio political issues through discussion of architectural theories and projects citing specific issues and themes that have led to and will shape the various aspects of the current and future built environment Ranging from Chomsky s examination of the US Mexico border as the architecture of oppression to Robert A M Stern s defence of projects for the Disney corporation and George W Bush this book places politics at the center of issues within contemporary architecture **Architects Today** Kester Rattenbury,Robert Bevan,Kieran Long,2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings **The Hermit's Hut** Kazi K. Ashraf,2013-10-31 The Hermit s Hut offers an original insight into the profound relationship between architecture and asceticism Although architecture continually responds to ascetic compulsions as in its frequent encounter with the question of excess and less it is typically considered separate from asceticism In contrast this innovative book explores the rich and mutual ways in which asceticism and architecture are played out in each other s practices The question of asceticism is also considered as neither a religious discourse nor a specific cultural tradition but as a perennial issue in the practice of culture The work convincingly traces the influences from early Indian asceticism to Zen Buddhism to the Japanese teahouse the latter opening the door to modern minimalism As the book s title suggests the protagonist of the narrative is the nondescript hermit s hut Relying primarily on Buddhist materials the author provides a complex narrative that stems from this simple structure showing how the significance of the hut resonates widely and how the question of dwelling is central to ascetic imagination In exploring the conjunctions of architecture and asceticism he breaks new ground by presenting ascetic practice as fundamentally an architectural project namely the fabrication of a last hut Through the conception of the last hut he looks at the ascetic challenge of arriving at the

edge of civilization and its echoes in the architectural quest for minimalism The most vivid example comes from a well known Buddhist text where the Buddha describes the ultimate ascetic moment or nirvana in cataclysmic terms using architectural metaphors The roof rafters will be shattered the Buddha declares and the architect will no longer build the house again As the book compellingly shows the physiological and spiritual transformation of the body is deeply intertwined with the art of building The Hermit's Hut weaves together the fields of architecture anthropology religion and philosophy to offer multidisciplinary and historical insights Written in an engaging and accessible manner it will appeal to readers with diverse interests and in a variety of disciplines whether one is interested in the history of ascetic architecture in India the concept of home in ancient India or the theme of the body as building **Negotiating Cultures** Pilar Maria Guerrieri, 2018-01-10

Focusing on one of the largest megacities in the world Delhi this volume is a rare peek into the ineluctable process of hybridization between Indian and other cultures within its local architecture and urban planning The book explores a segment of the history of Delhi from 1912 through 1962 when the contemporary megacity was born making a comparison between pre and post Independence which is relatively neglected in academia The author traces architectural and urban elements of the city of Delhi to understand how foreign developmental models were indigenized the resistance encountered in the process and finally their adaptation to local architectural contexts Highlighting the complexities of multiple Delhis with different or simultaneous cultural influences as well as with the various ways those influences have been interpreted or contextualized the author offers a fresh insight into what is happening in Delhi's globalized built environment nowadays The book aims to unearth the social relations emerging from the constant flux in style of architecture and its related elements in an urbanized area *Encyclopedia of Twentieth Century Architecture* R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *Woman's Eye, Woman's Hand* D. Fairchild Ruggles, 2014-04-21 With independence India experienced a dramatic social rupture but also a recuperation of political autonomy and a new sense of optimism that promised opportunities The country became a crucible for experimentation in modern and utopian architecture with new buildings cities and museums giving public face to the nation Indian architects and architectural projects claimed international attention and a generation of women entered professions such as architecture and design that had previously been closed to them They emerged as a pronounced political force and important patrons of art architecture and public space The mid 19th and 20th centuries saw a significant increase in women acting as arbiters of taste and shapers of the built

environment The emerging groups of female designers and female patrons were enabled by new norms for women The essays in this volume address these developments posing the important question did and do women produce art and architecture that reflect a feminine perspective How did women otherwise invisible and denied attention in the public sphere gain voice The writers look at these questions through both the political frame of gender as well as through family lineage and dynastic connections and their importance in women s patronage of the arts Published by Zubaan
