The Evolution of the Office of the President of the United States of America Sean Burns, 2022-07-18 *The Evolution of the Executive Office of the Presidency* is a history book that deals specifically with the Office of the Presidency How did it begin How was it created How did the office itself evolve from when President General George Washington stood on the steps of Federal Hall in New York City in 1789 to the office that is now occupied by incumbent President Joseph P Biden Due to recent historical events we as voters and taxpayers must heed caution in whom we select as a candidate for the office by asking the basic questions of will this candidate respect the integrity of the office for the actions of past presidents How has it reflected in the office itself as a whole in 1803 when Thomas Jefferson was meeting with the ambassador of France His intent was to buy the port of New Orleans However after corresponding with Napoleon Bonaparte the ambassador was able to go beyond that and do one better by offering President Jefferson the entire Louisiana territory While the United States Constitution has legal provisions on how to add new states to the union nothing in that near absolute document gives the chief executive the wherewithal of how to obtain the land so that new states can be added Article II of the United States Constitution enumerates the powers of commander in chief of all military forces However what kind of orders directives or missions that the president can order military personnel to

undertake is not listed The intelligence of the educations past experiences of the men themselves what was it that specifically had proven beyond any reasonable doubt that they would be the kind of men that we ought to be electing to the presidency George Washington was the first man elected to the presidency The Founding Fathers had designed the office with him in mind While George Washington was the incumbent president from 1789 to 1797 he established a very high standard of ethical morality Every man that has been elected after him was measured by that standard of ethical morality So we as a nation have collectively looked to such a standard in those we have elected That high standard of ethical morality was implicit to the kind of man that George Washington was so we ought to be looking for persons that would fit that standard This work started with a few essays written in college about the presidency They have been expanded on reedited and revised to where it is that the reader will be able to enjoy While it is not a biographical presentation of the presidents themselves the book is a way of measuring the presidents to determine if they fit the standard Two main sources of reference for this work the philosophy of government that was devised by French philosopher Charles Secondat better known as the Baron de Montesquieu as well as what Henry David Thoreau had written in Civil Disobedience The best government is one that governs least the best government is one that governs not at all which of these two philosophies has a president administrated by in acting as the chief magistrate How have their actions both positive and negative reflected on the office This book is about many things history ethics policy decisions philosophy of government that the presidents had prior to and during their respective administrations How have these philosophies and their experiences and political beliefs reflected on the office Within the contents of this book is a fictional story The Trial of a President For the president that is on trial is three hundred pounds a billionaire and married to a former Playboy playmate However the defendant is not being tried in a regular municipal criminal court of law Based on the saying a jury of one peers other past presidents are trying him in an extraordinary court of law The presiding judge is an ex president The prosecution and defense counsels are also former presidents How did this approach to the presidency violate the oath that he took An oath that George Washington had devised how in terms of the Article II parameters did he abuse the power of the office according to the precedents that was established by the men that held the office before him

has been recognizable for centuries or so it has seemed to Western scholars The 2019 Alta Conference on Argumentation co sponsored by the National Communication Association and the American Forensic Association aimed to question the generality of these intellectual traditions This resulting collection of essays deals with the possibility of having local theories of argument local to a particular time a particular kind of issue a particular place or a particular culture Many of the papers argue for reconsidering basic ideas about arguing to represent the uniqueness of some moment or location of discourse Other scholars are more comfortable with the Western traditions and find them congenial to the analysis of arguments that originate in discernibly distinct circumstances The papers represent different methodologies cover the experiences of different nations at different times examine varying sorts of argumentative events speeches court decisions food choices and sound explore particular personal identities and the issues highlighted by them and have different overall orientations to doing argumentation scholarship Considered together the essays do not generate one simple conclusion but they stimulate reflection about the particularity or generality of the experience of arguing and therefore the scope of our theories
