Electronic Hearth Cecelia Tichi, 1992-10-29 We all talk about the tube or box as if television were simply another appliance like the refrigerator or toaster oven But Cecilia Tichi argues that TV is actually an environment a pervasive screen world that saturates almost every aspect of modern life In *Electronic Hearth* she looks at how that environment evolved and how it in turn has shaped the American experience Tichi explores almost fifty years of writing about television in novels cartoons journalism advertising and critical books and articles to define the role of television in the American consciousness She examines early TV advertising to show how the industry tried to position the new device as not just a gadget but a prestigious new piece of furniture a highly prized addition to the home The television set she writes has emerged as a new electronic hearth the center of family activity John Updike described this primitive appeal of the hearth in *Roger's Version* Television is its irresistible charm a fire Entering an empty room we turn it on and a talking face flares into being Sitting in front of the TV Americans exist in a safety zone free from the hostility and violence of the outside world She also discusses long standing suspicions of TV viewing its often solitary almost autoerotic character its supposed numbing of the minds and imagination of children and assertions that watching television drugs the minds of Americans Television has been seen as treacherous territory for public figures from generals to presidents where satire and broadcast journalism often deflate their authority And the print culture of journalism and book publishing has waged a decades long war of survival against it only to see new TV generations embrace both the box and the book as a part of their cultural world In today's culture she writes we have become teleconscious seeing for example real life being certified through television as seen on TV and television constantly ratified through its universal presence in art movies music comic strips fabric prints and even references to TV on TV Ranging far beyond the bounds of the broadcast industry Tichi provides a history of contemporary American culture a culture defined by the television environment Intensively researched and insightfully written *The Electronic Hearth* offers a new understanding of a critical but much maligned aspect of modern life
