Emerging Research and Opportunities Neal, Julie, Neal, Brittany Lee, 2019-05-31 Oil and gas companies are continually upgrading drilling and production facilities in response to safety regulatory and technology advances causing the amount of data that an operator must interpret in order to optimize a facility's production to increase exponentially. Trained employees are at premium demand in the field and companies are willing to pay for skills. However, there are too many skill-specific positions available and too many untrained applicants and companies within this industry lack the recruiting, training, and experience necessary to train them. *Workforce Education at Oil and Gas Companies in the Permian Basin* Emerging Research and Opportunities is an essential scholarly resource that examines changing technical data analysis and decision-making skills required of operations or maintenance personnel as well as expectations for future changes. The book contrasts these needs against a typical oilfield worker's education level and skillset in order to target potential solutions for the challenges that face today's workforce. Highlighting topics such as economic development, oilfield technology, and employee training, this book is geared toward oil and gas workers, training facilitators, education practitioners, industry professionals, academicians, and researchers.

Examining the Impact of Community Colleges on the Global Workforce Jones, Stephanie J., Smith, Dimitra Jackson, 2015-08-04 In an effort to create a more educated workforce in the United States, many community colleges are implementing new practices and strategies to assist underprepared students. These efforts will ultimately support a stronger and more resilient global workforce. *Examining the Impact of Community Colleges on the Global Workforce* provides relevant theoretical and conceptual frameworks, best practices, and emerging empirical research about new approaches being employed in community colleges to prepare students for their post-collegiate careers. Featuring recent initiatives in educational settings, this publication is a critical reference source for higher education practitioners, policymakers, and graduate students in higher education administration programs interested in the innovative practices utilized by community colleges to educate underserved students.

Understanding and Facilitating Organizational Change in the 21st Century: Recent Research and Conceptualizations Adrianna Kezar, 2011-10-06 There is a widespread discontent with the quality of education and levels of college student achievement, particularly for undergraduates preparing for the professions. This report examines the educational challenges in preparing professionals, reviews the specific types of curriculum innovations that faculty and administrators have created or significantly revised to strengthen college graduates' abilities, and focuses on the societal changes and expectations produced by the acceleration in technology.
