Siewierska,2004-07 This textbook deals with the grammatical category of person which covers the first person the second person and the third person Drawing on data from over 700 languages Anna Siewierska compares the use of person within and across different languages and examines the factors underlying this variation She shows how person forms vary in substance in the nature of the semantic distinctions they convey in how they are used in sentences and discourse and in the way they function to convey social distinctions By looking at different types of person forms in the grammatical and social contexts in which they are used this book documents an underlying unity between them arguing against the treatment of person markers based on arbitrary sets of morphological and syntactic properties Clearly organized and accessibly written it will be welcomed by students and scholars of linguistics particularly those interested in grammatical categories and their use

Definiteness Christopher Lyons,1999-03-13 This 1999 textbook investigates definiteness both from a comparative and a theoretical point of view showing how languages express definiteness and what definiteness is It surveys a large number of languages to discover the range of variation in relation to definiteness and related grammatical phenomena such as demonstratives possessives and personal pronouns It outlines work done on the nature of definiteness in semantics pragmatics and syntax and develops an account on which definiteness is a grammatical category represented in syntax as a functional head the widely discussed D Consideration is also given to the origins and evolution of definite articles in the light of the comparative and theoretical findings Among the claims advanced are that definiteness does not occur in all languages though the pragmatic concept which it grammaticalizes probably does *Syntax* P. H. Matthews,1981-07-30 This textbook introduces the basic concepts of syntax The approach is thematic dealing with the nature of syntactic relations and the main types of construction predication attribution coordination etc Professor Matthews draws attention to the weakness of much current syntactic theory and considers the problem of indeterminacy which theorists have been unable to treat in any systematic way **Minimalist Syntax** Andrew Radford,2004-05-27 Publisher Description
