What Determines an Algebraic Variety? János Kollár, Max Lieblich, Martin Olsson, Will Sawin, 2023-07-25 A pioneering new nonlinear approach to a fundamental question in algebraic geometry One of the crowning achievements of nineteenth century mathematics was the proof that the geometry of lines in space uniquely determines the Cartesian coordinates up to a linear ambiguity What Determines an Algebraic Variety develops a nonlinear version of this theory offering the first nonlinear generalization of the seminal work of Veblen and Young in a century While the book uses cutting edge techniques the statements of its theorems would have been understandable a century ago despite this the results are totally unexpected Putting geometry first in algebraic geometry the book provides a new perspective on a classical theorem of fundamental importance to a wide range of fields in mathematics Starting with basic observations the

book shows how to read off various properties of a variety from its geometry The results get stronger as the dimension increases The main result then says that a normal projective variety of dimension at least 4 over a field of characteristic 0 is completely determined by its Zariski topological space There are many open questions in dimensions 2 and 3 and in positive characteristic

Algorithm Engineering Matthias Müller-Hannemann,Stefan Schirra,2010-08-05 Algorithms are essential building blocks of computer applications However advancements in computer hardware which render traditional computer models more and more unrealistic and an ever increasing demand for efficient solution to actual real world problems have led to a rising gap between classical algorithm theory and algorithmics in practice The emerging discipline of Algorithm Engineering aims at bridging this gap Driven by concrete applications Algorithm Engineering complements theory by the benefits of experimentation and puts equal emphasis on all aspects arising during a cyclic solution process ranging from realistic modeling design analysis robust and efficient implementations to careful experiments This tutorial outcome of a GI Dagstuhl Seminar held in Dagstuhl Castle in September 2006 covers the essential aspects of this process in ten chapters on basic ideas modeling and design issues analysis of algorithms realistic computer models implementation aspects and algorithmic software libraries selected case studies as well as challenges in Algorithm Engineering Both researchers and practitioners in the field will find it useful as a state of the art survey

Lightlike Submanifolds of Semi-Riemannian Manifolds and Applications Krishan L. Duggal, Aurel Bejancu, 2013-04-17 This book is about the light like degenerate geometry of submanifolds needed to fill a gap in the general theory of submanifolds The growing importance of light like hypersurfaces in mathematical physics in particular their extensive use in relativity and very limited information available on the general theory of lightlike submanifolds motivated the present authors in 1990 to do collaborative research on the subject matter of this book Based on a series of author's papers Bejancu 3 Bejancu Duggal 1 3 Duggal 13 Duggal Bejancu 1 2 3 and several other researchers this volume was conceived and developed during the Fall 91 and Fall 94 visits of Bejancu to the University of Windsor Canada The primary difference between the lightlike submanifold and that of its non degenerate counterpart arises due to the fact that in the first case the normal vector bundle intersects with the tangent bundle of the submanifold Thus one fails to use in

the usual way the theory of non degenerate submanifolds of Chen 1 to define the induced geometric objects such as linear connection second fundamental form Gauss and Weingarten equations on the light like submanifold Some work is known on null hypersurfaces and degenerate submanifolds see an up to date list of references on pages 138 and 140 respectively Our approach in this book has the following outstanding features a It is the first ever attempt of an up to date information on null curves lightlike hypersurfaces and submanifolds consistent with the theory of non degenerate submanifolds **Key Maths GCSE** ,
