Broadcasting Politics in Japan Ellis S. Krauss, 2018-09-05 The aftermath of Japan's 1945 military defeat left its public institutions in a state of deep crisis virtually every major source of state legitimacy was seriously damaged or wholly remade by the postwar occupation Between 1960 and 1990 however these institutions renewed their strength taking on legitimacy that erased virtually all traces of their postwar instability How did this transformation come about This is the question Ellis S Krauss ponders in *Broadcasting Politics in Japan* his answer focuses on the role played by the Japanese mass media and in particular by Japan's national broadcaster NHK Since the 1960s television has been a fixture of the Japanese household and NHK's TV news has until very recently been the dominant and most trusted source of political information for the Japanese citizen NHK's news style is distinctive among the broadcasting systems of industrialized countries it emphasizes facts over interpretation and gives unusual priority to coverage of the national bureaucracy Krauss argues that this approach is not simply a reflection of Japanese culture but a result of the organization and processes of NHK and their relationship with the state These factors had profound consequences for the state's postwar re-legitimization while the commercial networks' recent challenge to NHK has helped engender the wave of cynicism currently faced by the state Krauss guides the reader through the complex interactions among politics media organizations and Japanese journalism to demonstrate how NHK television news became a shaper of Japan's political world rather than simply a lens through which to view it

Technology, Television, and Competition Jeffrey A. Hart, 2004-02-05 In the late 1980s and 1990s the advanced industrial countries considered replacing the existing analogue television infrastructure with a new digital one A key common feature to the debates over digital TV DTV in the United States Western Europe and Japan was the eventual victory of the ideas of digitalism the superiority of everything digital over everything analogue and of digital convergence the merging of computing telecommunications and broadcasting infrastructures made possible by digitalization in public debates over standards Jeffrey Hart's book shows how nationalism and regionalism combined with digitalism to produce three different and incompatible DTV standards in the three regions an outcome which has led to missed opportunities in developing the new technologies Hart's book contributes to our understanding of relations between business and government and of competition between the world's great economic powers *Media and Politics in Japan* Susan Pharr, Ellis S.

Juries in the Japanese Legal System Dimitri Vanoverbeke, 2015-04-10 Trial by jury is not a fundamental part of the Japanese legal system but there has been a recent important move towards this with the introduction in 2009 of the lay assessor system whereby lay people sit with judges in criminal trials This book considers the debates in Japan which surround this development It examines the political and socio legal contexts contrasting the view that the participation of ordinary citizens in criminal trials is an important manifestation of democracy with the view that Japan as a society where authority is highly venerated is not natural territory for a system where lay people are likely to express views at odds with expert judges It discusses Japan's earlier experiments with jury trials in the late 19th Century the period 1923-43 and up to 1970 in US controlled Okinawa compares developing views in Japan on this issue with views in other countries where dissatisfaction with the jury system is often evident and concludes by assessing how the new system in Japan is working out and how it is likely to develop
