Creating the Future Michael Fallon, 2014-08-18 Conceived as a challenge to long standing conventional wisdom *Creating the Future* is a work of social history cultural criticism that examines the premise that the progress of art in Los Angeles ceased during the 1970s after the decline of the Ferus Gallery the scattering of its stable of artists Robert Irwin Ed Kienholz Ed Moses Ed Ruscha and others and the economic struggles throughout the decade and didn t resume until sometime around 1984 when Mark Tansey Alison Saar Judy Fiskin Carrie Mae Weems David Salle Manuel Ocampo among others became stars in an exploding art market However this is far from the reality of the L A art scene in the 1970s The passing of those fashionable 1960s era icons in fact allowed the development of a chaotic array of outlandish and independent voices marginalized communities and energetic sometimes bizarre visions that thrived during the stagnant 1970s Fallon s narrative describes and celebrates through twelve thematically arranged chapters the wide range of intriguing artists and the world not just the objects they created He reveals the deeper more culturally dynamic truth about a significant moment in

American art history presenting an alternative story of stubborn creativity in the face of widespread ignorance and misapprehension among the art cognoscenti who dismissed the 1970s in Los Angeles as a time of dissipation and decline. Coming into being right before their eyes was an ardent local feminist art movement which had lasting influence on the direction of art across the nation; an emerging Chicano Art movement spreading Chicano murals across Los Angeles and to other major cities; a new and more modern vision for the role and look of public art; a slow consolidation of local street sensibilities; car fetishism; gang and punk aesthetics into the earliest version of what would later become the Lowbrow art movement; the subversive co-opting in full view of Pop Art of the values, aesthetics and imagery of Tinseltown by a number of young and innovative local artists who would go on to greater national renown; and a number of independent voices who, lacking the support structures of an art movement or artist cohort, pursued their brilliant artistic visions in near isolation. Despite the lack of attention, these artists would later reemerge as visionary signposts to many later trends in art. Their work would prove more interesting, more lastingly influential, and vastly more important than ever imagined or expected by those who saw it or even by those who created it.

1970s Los Angeles: Creating the Future is a visionary work that seeks to recapture this important decade and its influence on today's generation of artists. *Climate Disaster Preparedness* Dennis Del Favero, Susanne Thurow, Michael J. Ostwald, Ursula Frohne, 2024-05-02. As a result of global warming, extreme events such as firestorms and flash floods pose increasingly unpredictable and uncertain existential threats, taking lives, destroying communities, and wreaking havoc on habitats. Current aesthetic, technological, and scientific frameworks struggle to imagine, visualise, and rehearse human interactions with these events, hampering the development of proactive foresight, readiness, and response. This open access book demonstrates how the latest advances in creative arts, intelligent systems, and climate science can be integrated and leveraged to transform the visualisation of extreme event scenarios. It reframes current practice from passive perception of pre-scripted illustrations to active immersion in evolving, life-like interactive scenarios that are geo-located. Drawing on the multidisciplinary expertise of leaders in the creative arts, climate sciences, environmental engineering, and intelligent systems, this book examines the ways in which climate disaster preparedness can be reformulated through practices that address dynamic and unforeseen interactions between climate and human life worlds. Grouped into four sections: picturing, narrating, rehearsing, and communicating, this book maps this approach by exploring the emerging strengths and current limitations of each discipline in addressing the challenge of envisioning the unpredictable interaction of extreme events with human populations and environments. This book provides a timely intervention into the global discourse on how art, culture, and technology can address climate disaster resilience. It appeals to readers from multiple fields, offering academic, industry, and community audiences novel insights into a profound gap in the current knowledge, policy, and action landscape.
