Whitaker's Books in Print, 1998

Private Education Geoffrey Walford, 2005-11-24. Private schools are central to the reproduction of social inequality. For example, whilst in the UK providing only about seven per cent of the school population, about half of the undergraduates at Oxford and Cambridge still come from the private sector. Private schools have long been associated with privilege and elitism. While this traditional elitist aspect to the private sector is still central, the private school sector is actually far more diverse than is usually acknowledged. It now includes many small schools and faith-based schools that may not offer the traditional advantages of the private sector but which provide a particular environment deemed desirable by parents. In spite of their educational and social importance, there has been very little academic research and writing on private schools. The proposed book will be the culmination of Professor Walford's research into private schools over the past twenty years.
