Syriac Christianity under Late Sasanian and Early Islamic Rule G.J. Reinink,2023-07-28 The articles in this volume are concerned with the literary responses of the Syriac communities in the Middle East to the drastic political changes of the 7th and 8th centuries in particular the Persian occupation of the eastern provinces of Byzantium under Khusrau II and the Islamic conquests and Umayyad rule Several studies discuss the influential Syriac works concerning Alexander the Great written shortly after AD 628 which present the Byzantine emperor Heraclius as a new Alexander attention is given to their polemical and propagandistic functions and to their influence on early apocalyptic texts

which respond to the Arab conquests and Abd al Malik's religious propaganda at the end of the 7th century. Other studies deal with the beginnings of Syriac apologetic literature in response to early Islam, discussing texts of the first decades of the 8th century. A Hebrew Alexander Romance According to MS London, Jews' College No. 145 Leo (Archipresbyter), 1992. The reader is presented here with a study of the text of a Hebrew manuscript which is a medieval version of the Alexander Romance or the legendary history of Alexander the Great. The Hebrew text in this unique manuscript known as MS London is a translation of the *Historia de Preliis Alexandri Magni*, a widespread Latin version of the Alexander Romance. The Latin text was very useful for establishing an almost complete text of the London version and for identifying names and terms. A comparison of our text with other Hebrew sources on Alexander was of similar help in establishing a correct reading. The introduction which precedes the text and the English translation offers a survey of research into the history and development of Alexander traditions in Greek, Latin and Hebrew literature as well as a detailed analysis of the present text concerning its language style and themes. This study is concluded by selective notes to the text and indices on personal and geographical names and foreign terms with their Latin equivalents.

The Nature of War Jim Stempel, 2014-11-26. For over 12,000 years, human beings have warred, slaughtering each other with persistence and brutality. From spear point to thermonuclear ordnance, human ingenuity has had a serious downside. In the 20th century alone, wars claimed more than 90 million lives. Yet war's origins, meaning and evolution over the millennium remain to this day a mystery. Why is warfare almost as old as man himself? How is it that a creature capable of producing great art, architecture, literature, medicine and wondrous acts of compassion is simultaneously capable of such cruel and wanton slaughter? To answer these and other questions, this thoughtful study journeys across time and disciplines to examine and sensibly explain human warfare, clarify its source and driving energy and thoughtfully develop the prospect of a true and lasting peace.
