communities proliferated across North America yielding a wealth of ethnographic information that began to surface in the flagship journal the American Anthropologist and researchers increasingly debated and probed deeper into the roots and significance of ritual myth language social organization and the physical make up and prehistory of Native Americans The fifty five selections in this volume represent the interests of and accomplishments in American anthropology from the establishment of the American Anthropologist through World War I The articles in their entirety showcase the state of the subfields of anthropology archaeology linguistics physical anthropology and cultural anthropology as they were imagined and practiced at the dawn of the twentieth century Examples of important ethnographic accounts and interpretive debates are also included Introducing this collection is a historical overview of the beginnings of American anthropology by A Irving Hallowell a former president of the AAA Algonquian Researches, Comprising Inquiries Respecting The Mental Characteristics Of The North American Indians Henry Rowe Schoolcraft, 2018-03-02 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **The Demon of the Continent** Joshua David Bellin, 2012-06-30 In recent years the study and teaching of Native American oral and written art have flourished During the same period there has been a growing recognition among historians anthropologists and ethnohistorians that Indians must be seen not as the voiceless nameless faceless Other but as people who had a powerful impact on the historical development of the United States Literary critics however have continued to overlook Indians as determinants of American rather than specifically Native American literature The notion that the presence of Indian peoples shaped American literature as a whole remains unexplored In The Demon of the Continent Joshua David Bellin probes the complex interrelationships among Native American and Euro American cultures and literatures from the mid seventeenth to the mid nineteenth centuries He asserts that cultural contact is at the heart of American literature For Bellin previous studies of Indians in American literature have focused largely on the images Euro American writers constructed of indigenous peoples and have thereby only perpetuated those images Unlike authors of those earlier studies Bellin refuses to reduce Indians to static antagonists or fodder for a Euro American imagination Drawing on works such as Henry David Thoreau's Walden William Apess A Son of the Forest and little known works such as colonial

Indian conversion narratives he explores the ways in which these texts reflect and shape the intercultural world from which they arose In doing so Bellin reaches surprising conclusions that Walden addresses economic clashes and partnerships between Indians and whites that William Bartram s Travels encodes competing and interpenetrating systems of Indian and white landholding that Catherine Sedgwick s Hope Leslie enacts the antebellum drama of Indian conversion that James Fenimore Cooper and Henry Wadsworth Longfellow struggled with Indian authors such as George Copway and David Cusick for physical ideological and literary control of the nation The Demon of the Continent proves Indians to be actors in the dynamic processes in which America and its literature are inescapably embedded Shifting the focus from textual images to the sites of material ideological linguistic and aesthetic interaction between peoples Bellin reenvision American literature as the product of contact conflict accommodation and interchange
