This book is the first comprehensive account of classical music on all British radio stations BBC and commercial between 1945 and 1995 It narrates the shifting development of those services from before the launch of the Third Programme until after the start of Classic FM examining the output from both qualitative and quantitative perspectives as well as recounting some of the stories and anecdotes which enliven the tale During these fifty years British classical music radio featured spells of broad multi channel classical music radio with aspirational and mainstream culture enjoying positive interactions followed by periods of more restricted and exclusive output in a paradigm of the place of high culture in UK society as a whole The history was characterised by the recurring tensions between elite and popular provision and the interplay of demands for highbrow and middlebrow output and also sheds new light on the continuing relevance of class in Britain It is an important and unique resource for those studying British history in the second half of the twentieth century as well as being a compelling and diverting account for enthusiasts for classical music radio

The Politics of Public Broadcasting in Britain and Japan Henry Laurence,2022-07-29 The BBC and NHK have dominated their national media systems since the 1920s and still play a central role in shaping political social and cultural life Both are highly trusted news organizations and vitally influence national identity Yet despite remarkably similar organizational and funding structures they differ in their editorial autonomy relationship to the state and in the social and cultural roles they play While the BBC proud of its independence acts as a watchdog on the powerful NHK prefers a guide dog role cooperating with rather than confronting political elites The BBC is also more willing to challenge prevailing social norms often serving as an agent of social change NHK prefers to avoid controversy serving as an agent of social stability The book argues that these differences were shaped by decades of conflict

and cooperation between broadcasters governments commercial media interest groups and audiences The broadcasters adopted distinctive editorial strategies to retain public support and elite approval in the face of technological upheaval hostility from commercial rivals and continuous political interference Both however continue to uphold the belief that democratic and social goals are better served by public rather than commercial media
