Sniping Rifles in the War Against Japan 1941-45 John Walter, 2024-02-15 Fully illustrated this absorbing study explores the evolving sniping technology and tactics employed by both sides in Asia and the Pacific during 1941-45. During World War II both the Japanese and their Allied opponents made widespread use of snipers armed with a variety of rifles, scopes and accessories and prepared by widely differing levels of training and tactical doctrine. The challenges of fighting in a variety of harsh environments from the Pacific islands to the vast expanses of China prompted improvisation and innovation on both sides in the ongoing war between snipers and their adversaries. Often operating at relatively close ranges in restrictive terrain, snipers made particularly ingenious use of camouflage and deception as the fighting spread across Asia and the Pacific in the wake of the Pearl Harbor attack while troops tasked with countering enemy marksmen had to learn the hard way how best to defeat a seemingly invisible enemy. Small arms expert John Walter considers the strengths and limitations of the rifles, scopes and accessories deployed by Japanese snipers and their Allied counterparts as well as their different approaches to sniping tactics and training. Specially commissioned artwork and carefully chosen photographs illustrate this enthralling study of the sniping war in Asia and the Pacific during World War II. *Forthcoming Books* Rose Army, 1990

Zabecki, 2015-05-01 World War II defined the 20th century and shaped many events from the decolonization of Africa to the rise and fall of the Berlin Wall. This encyclopedia offers a focused overview of this complex and volatile era: the circumstances that led up to war, the underlying causes, its unfolding and consequences. Organized for quick and precise access, more than 1300 entries by 150 experts are arranged in six sections for easy reference and consultation. All the key ideas, events, actions, weapons, individuals and organizations that played vital roles in the war are covered from the Axis Pact to the Arab League, from the OSS to the Africa Corps, from the Chetniks to the Jedburghs, from the battle of Kursk to Operation Mincemeat, from Bill Donovan to Otto Skorzeny, from Gestapo to SMERSH, from Georgi Zhukov to Jean Leclerc, from the 88 gun to the Norden bombsight. Covers important neglected subjects. The Encyclopedia puts special emphasis on the often neglected operations in Eastern Europe and Russia. A key section inspects and rates all the major weapons with handy tables for easy comparison. And in recognition of the first large scale participation of women in the war, the volume thoroughly documents their individual and unit contributions to the Allied effort. Finally, the encyclopedia discusses battlefield realities that explain, for example, why the airborne drops at Normandy

succeeded and the ones at Arnheim failed A bibliography glossary maps photographs and weapons and data tables enhance the coverage Also includes 16 maps
