What Is a Border? Manlio Graziano,2018-02-27 The fall of the Berlin Wall symbol of the bipolar order that emerged after World War II seemed to inaugurate an age of ever fewer borders The liberalization and integration of markets the creation of vast free trade zones the birth of a new political and monetary union in Europe all seemed to point in that direction Only thirty years later the tendency appears to be quite the opposite Talk of a wall with Mexico is only one sign among many that boundaries and borders are being revisited expanding in number and being reintroduced where they had virtually been abolished Is this an out of step deceptive last gasp of national sovereignty or the victory of the weight of history over the power of place The fact that borders have made a comeback warns Manlio Graziano in his analysis of the dangerous fault lines that have opened in the contemporary world does not mean that they will resolve any problems His geopolitical history and analysis of the phenomenon draws our attention to the ground shifting under our feet in the present and allows us to speculate on what might happen in the future

Cubism and Reality Christopher Green, 2025-08-21 What was Cubism How did this strange new way of making paintings and sculptures enable artists so decisively to change the trajectory of Modern Art In responding to these questions distinguished art historian Christopher Green presents a bold new interpretation of the movement and three of its key protagonists Stemming from a critical re evaluation of the author's own first responses to Cubist artworks as a student of the late artist and critic John Golding *Cubism and Reality* challenges the commonly held view of Cubism as either a retreat from reality into abstraction or an invitation to convert the real into the surreal arguing instead that Georges Braque Pablo Picasso and Juan Gris wanted above all to find ways of intensifying and expanding painting's capacity to give viewers more not less of their lived experience of the world Lavishly illustrated and filled with rich new insights and approaches to the artwork that are the product of decades worth of research Green argues that for the three artists reality was not objectively always there but was created by their own perceptions and could be transformed by their imaginations The artwork becomes not merely a dead material fact but somewhere into which wishes lived experiences and memories can enter ours over a century later as well as theirs Green explores how Cubist artworks ask us to reflect in far reaching ways on visual art's relationship to everyday visual experience and questions how it is that we still believe that drawings paintings and sculptures can represent the world as we see and know it In doing so *Cubism and Reality* tackles a fundamental issue that has preoccupied artists critics and art enthusiasts for over a century well into our present age the survival of hand made representational artworks in the epoch of photography film and latterly digital reproduction
