Bubonic Plague In Nineteenth Century China:

Bubonic Plague in Nineteenth-Century China Carol Ann Benedict, 1996 This book the first work in English on the history of disease in China traces an epidemic of bubonic plague that began in Yunnan province in the late eighteenth century spread throughout much of southern China in the nineteenth century and eventually exploded on the world scene as a global pandemic at the end of the century The author finds the origins of the pandemic in Qing economic expansion which brought new populations into contact with plague bearing animals along China's southwestern frontier She shows how the geographic diffusion of the disease closely followed the growth of interregional trading networks particularly the domestic trade in opium during the nineteenth century A discussion of foreign interventions during plague outbreaks along China's southern coast links the history of plague to the political impact of imperialism on China and to the ways in which European cultural representations of the Chinese influenced the theory and practice of colonial medicine *Bubonic Plague in*

The Top Ten Diseases of All Time Stacey Smith?,2023-10-24 Infectious diseases have been with us for millennia and continue to pose a threat from the irritation of flu season to the potential extinction of our species We instinctively fear them and alter our behaviour as a result The reason we bury bodies six feet deep is because that was the depth that stopped plague transmission from the dead in the Middle Ages Many religious practices such as avoiding certain meats were established because of foodborne disease transmission In *The Top Ten Diseases of All Time* Stacey Smith presents the top ten deadliest diseases and their effects on society providing a wealth of information about the trajectory and terrible impact of each disease and humanity's reaction to these diseases throughout the millennia Did you know for example that The medical symbol evolved from the worms wrapped around a stick because that was the only way to remove Guinea worms from the body so having a stick meant you were a doctor Smallpox is the third worst disease ever yet it remains the only successfully eradicated human disease but not for long thanks in part to a successful vaccine in part to photographic recognition cards and in part due to helicopter led forced vaccinations of whole villages in the former Yugoslavia This brings up issues of individual rights versus public good that remain relevant today Four diseases were targeted for eradication in the 20th century the failure to do so led directly to the creation of the environmental movement The inability of priests to explain how to stop the plague in the Middle Ages broke the back of the church as an all powerful and all knowing institution and led to colonialism and slavery *The Top Ten Diseases of All Time* offers a fascinating overview of the deadliest diseases to spread throughout the world including HIV AIDS Spanish Flu Measles The Black Death Smallpox and others

case history William Summers relates how this plague killed as many as 60 000 people in less than a year and uses the analysis to examine the actions and interactions of the multinational doctors politicians and ordinary residents who responded to it Summers covers the complex political and economic background of early twentieth century Manchuria and then moves on to the plague itself addressing the various contested stories of the plague s origins development and ecological ties Ultimately Summers shows how because of Manchuria s importance to the world powers of its day the plague brought together resources knowledge and people in ways that enacted in miniature the triumphs and challenges of transnational medical projects such as the World Health Organization

Twentieth-century Colonialism and China

Bryna Goodman, David S. G. Goodman, 2012 Colonialism in China was a piecemeal agglomeration that achieved its greatest extent in the first half of the twentieth century the last edifices falling at the close of the century The diversity of these colonial arrangements across China s landscape defies systematic characterization This book investigates the complexities and subtleties of colonialism in China during the first half of the twentieth century In particular the contributors examine the interaction between localities and forces of globalization that shaped the particular colonial experiences characterizing much of China s experience at this time In the process it is clear that an emphasis on interaction synergy and hybridity can add much to an understanding of colonialism in Twentieth Century China based on the simple binaries of colonizer and colonized of aggressor and victim and of a one way transfer of knowledge and social understanding To provide some kind of order to the analysis the chapters in this volume deal in separate sections with colonial institutions of hybridity colonialism in specific settings the social biopolitics of colonialism colonial governance and Chinese networks in colonial environments Bringing together an international team of experts Twentieth Century Colonialism and China is an essential resource for students and scholars of modern Chinese history and colonialism and imperialism

The Making of Modern Chinese Medicine, 1850-1960 Bridie Andrews, 2014-12-20 Medical care in nineteenth century China was spectacularly pluralistic herbalists shamans bone setters midwives priests and a few medical missionaries from the West all competed for patients In the century that followed pressure to reform traditional medicine in China came not only from this small clutch of Westerners but from within the country itself as governments set on modernization aligned themselves against the traditions of the past and individuals saw in the Western system the potential for new wealth and power This book examines the dichotomy between Western and Chinese medicine showing how it has been greatly exaggerated As missionaries went to lengths to make their medicine more acceptable to Chinese patients modernizers of Chinese medicine worked to become more scientific by eradicating superstition and creating modern institutions Andrews challenges the supposed superiority of Western medicine in China while showing how traditional Chinese medicine was deliberately created in the image of a modern scientific

practice The Politically Incorrect Guide to Pandemics Steven W. Mosher, 2022-07-26 Deadly plagues have ripped across the globe for centuries and will continue to do so in the future From the Black Death to Smallpox and the Hong Kong flu seven of the ten worst plagues in history originated in China But the Covid 19 pandemic was something entirely new a genetically engineered pathogen that was deliberately released upon the world for the geopolitical profit of a Communist government In The Politically Incorrect Guide to Pandemics Steven Mosher a leading authority on China devastates politically correct narratives about the Covid 19 pandemic and the deadliest plagues in history With expert insight he reveals Mountains of evidence that the Covid 19 pandemic originated in a Wuhan lab and not a wet market What life was like under plagues of the past and how these compare to the Covid 19 pandemic How Communist governments benefit economically and strategically from international plagues Chinese Communist Party source documents revealing viruses bioengineered to wreak global havoc The next pandemic may be the most devastating plague of all time The Politically Incorrect Guide to Pandemics sounds the alarm to prepare for a dangerous pandemic future *The Origins of the Modern World* Robert B. Marks, 2024-01-02 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the environmental constraints of the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world Now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century and why the changed relationship of humans to the environmental likely will be the hallmark of the modern era the Anthropocene Once again arguing that the US rise to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years **Empires of Panic** Robert Peckham, 2015-01-01 *Empires of Panic* is the first book to explore how panics have been historically produced defined and

managed across different colonial imperial and post imperial settings from early nineteenth century East Asia to twenty first century America Contributors consider panic in relation to colonial anxieties rumors indigenous resistance and crises particularly in relation to epidemic disease How did Western government agencies policymakers planners and other authorities understand deal with and neutralize panics What role did evolving technologies of communication play in the amplification of local panics into global events Engaging with these questions the book challenges conventional histories to show how intensifying processes of intelligence gathering did not consolidate empire but rather served to produce critical uncertainties the uneven terrain of imperial panic Robert Peckham is associate professor in the Department of History and co director of the Centre for the Humanities and Medicine at the University of Hong Kong Charting the relays of rumor and knowledge that stoke colonial fears of disease disorder and disaster Empires of Panic offers timely and cautionary insight into how viscerally epidemics inflame imperial anxieties and how words and their communication over new technologies accelerate panic rally government intervention and unsettle and entrench the exercise of global power Relevant a century ago and even more so today Nayan Shah University of Southern California author of Contagious Divides Epidemics and Race in San Francisco s Chinatown Empires generated anxiety as much as ambition This fine study focuses on anxieties generated by disease It is the first book of its kind to track shifting forms of panic through different geopolitical regimes and imperial formations over the course of two centuries Working across medical and imperial histories it is a major contribution to both Andrew S Thompson University of Exeter author of Empire and Globalisation Networks of People Goods and Capital in the British World c 1850 1914 with Gary B Magee

Epidemic Encounters, Communities, and Practices in the Colonial World Poonam Bala, Russel Viljoen, 2023-01-24 The essays in this volume examine the nature and extent of disease on indigenous communities and local populations located within the vast regions of the Indian and Pacific Oceans as a result of colonial sea power and colonial conquest While this established a long term impact of disease on populations the essays also offer insights into the dynamics of these populations in resisting colonial intrusions and introduction of disease to newly acquired territories

Encyclopedia of the Black Death Joseph P. Byrne, 2012-01-16 This encyclopedia provides 300 interdisciplinary cross referenced entries that document the effect of the plague on Western society across the four centuries of the second plague pandemic balancing medical history and technical matters with historical cultural social and political factors Encyclopedia of the Black Death is the first A Z encyclopedia to cover the second plague pandemic balancing medical history and technical matters with historical cultural social and political factors and effects in Europe and the Islamic world from 1347 1770 It also bookends the period with entries on Biblical plagues and the Plague of Justinian as well as modern era material regarding related topics such as the work of Robert Koch and Louis Pasteur the Third Plague Pandemic of the mid 1800s and plague in the United States Unlike previous encyclopedic works about this subject that deal broadly with infectious disease and its social or historical contexts including the author s own this interdisciplinary work synthesizes much

of the research on the plague and related medical history published in the last decade in accessible compellingly written entries Controversial subject areas such as whether plague was bubonic plague and the geographic source of plague are treated in a balanced and unbiased manner *Epidemics in Modern Asia* Robert Peckham,2016-04-28 Epidemics have played a critical role in shaping modern Asia Encompassing two centuries of Asian history Robert Peckham explores the profound impact that infectious disease has had on societies across the region from India to China and the Russian Far East The book tracks the links between biology history and geopolitics highlighting infectious disease s interdependencies with empire modernization revolution nationalism migration and transnational patterns of trade By examining the history of Asia through the lens of epidemics Peckham vividly illustrates how society s material conditions are entangled with social and political processes offering an entirely fresh perspective on Asia s transformation *China* Robert B. Marks,2017-02-13 This deeply informed and clearly written text provides a comprehensive and comprehensible history of China from prehistory to the present Now updated to include recent political events and scientific research the book focuses on the interaction of humans and their environment Tracing changes in the physical and cultural world that is home to a fifth of humankind Robert B Marks illuminates the paradoxes inherent in China s environmental narrative demonstrating how historically sustainable practices can in fact be profoundly ecologically unsound The author also reevaluates China s traditional heroic storyline highlighting the marginalization of nature and contacts with other peoples that followed the spread of Chinese civilization while examining the development of a distinctly Chinese way of relating to and altering the environment Unmatched in his ability to synthesize a complex subject clearly and cogently Marks has written an accessible yet nuanced history for any student interested in China past or present or indeed in the world s environmental future **HIV/AIDS, Health and the Media in China** Johanna Hood,2011-01-25 HIV AIDS is an increasingly serious problem in China with an increasing number of new cases every year As a result HIV organizations have boomed with both state and non governmental organisations responding to the threat with campaigns to increase public awareness of the disease utilising the media as the primary tool to reshape citizens understandings and views of HIV AIDS This book explores how HIV AIDS is portrayed in China s media It argues that despite increasing education campaigns media coverage and social and academic openness towards HIV AIDS many Chinese of the majority Han ethnic group regard infection as a distant possibility believing themselves to be immune and infection a problem only for certain non Han ethnic groups with perceived lower moral standards in particular black Africans The book explores how HIV AIDS is reported analysing the language used in constructing and encoding the health narrative its subjects and ideas about the disease It demonstrates how China s media frequently employs negative events to present the most extreme possibilities of poverty danger disasters and disease with black Africa portrayed as an antiquated distant and socioculturally and politically backward place uniquely unsuitable for the containment of disease in contrast with the progressive scientifically sophisticated and morally upstanding Chinese It argues

that this discourse has had the effect of distancing many Chinese from the perceived possibility of infection thus compromising the effectiveness of public health campaigns on HIV AIDs It suggests that the key to combating the spread of the disease lies in challenging the racialised narratives through which the disease is portrayed in China s media rather than simply by aiming to educate greater numbers of people
