**Bucky** Hugh Kenner, 1973      **Bucky; a guided tour of Buckminster Fuller** H. Kenner, 1973      **Buckminster Fuller** Thomas T. K. Zung, 2002-03-20 Buckminster Fuller inventor thinker and architect was one of the best known Americans of the twentieth century Often compared to Leonardo da Vinci and called the planet's friendly genius he was the inventor of the geodesic dome the man who coined the term spaceship earth and an educator without parallel Yet most of his books are out of print today To remedy this situation his longtime friend and architectural partner Thomas Zung has compiled a Bucky Fuller reader This anthology consists of chapters selected from twenty of Bucky's many books each with a new Introduction by such notables as Arthur C Clarke Steve Forbes Calvin Tomkins Dr Martin Meyerson Sir Harold W Kroto Arthur L Loeb E J Applewhite and others Altogether this book provides an overview of a remarkable intellectual career and the best possible introduction to the man and his thought Bucky Fuller was one of the most original thinkers and builders that America has ever produced and this book makes his work available to a new generation at the beginning of a new millennium      **New Views on R. Buckminster Fuller** Hsiao-yun Chu, Roberto G. Trujillo, 2009 In this book leading scholars in architecture design history and communications discuss the work of R Buckminster Fuller in the context of the larger social and cultural patterns of the twentieth century      **Edison's Concrete Piano** Judy Wearing, 2009-10-31 Not even geniuses get it right the first time An entertaining look at the failures of great inventors Booklist To achieve great things you have to be willing to take risks and as Edison's Concrete Piano reveals some of the most famous names in history experienced plenty of flops and face plants in the course of their careers Thomas Edison for example not only revolutionized the world with the light bulb but also designed a concrete piano a nonoperational helicopter made from box kites and piano wire and a machine to speak to the dead Alexander Graham Bell inventor of the telephone actually devoted most of his time to his sheep farm in Nova Scotia devising a multi-nippled sheep somewhere along the way You'll also read about Leonardo da Vinci's walk on water shoes George Washington Carver's miracle peanut cure and much more The ludicrous ideas faulty designs and offbeat hobbies in this volume will inspire laughs and serve as a reminder that even the very best minds make mistakes Captivating This book is full of lessons for inventors and non-inventors alike Henry Petroski author of *Success through Failure*      *Buckminster Fuller's Universe* Lloyd Steven Seiden, 1989-04-21 A sympathetic even advocacy account of the life and work of the designer engineer and architect interpreting his creations as visible models of his philosophy Well illustrated including diagrams showing the principles of his designs Annotation copyright Book News Inc Portland Or      **A More Perfect Union** Linda Sargent Wood, 2012-08-01 In 1962 when the Cold War threatened to ignite in the Cuban Missile Crisis when more nuclear test bombs were detonated than in any other year in history Rachel Carson released her own bombshell *Silent Spring* to challenge society's use of pesticides To counter the use of chemicals and bombs the naturalist articulated a holistic vision She wrote about a web of life that connected humans to the world around them and argued that actions taken in one place

had consequences elsewhere Thousands accepted her message joined environmental groups flocked to Earth Day celebrations and lobbied for legislative regulation Carson was not the only intellectual to offer holistic answers to society's problems This book uncovers a sensibility in post World War II American culture that both tested the logic of the Cold War and fed some of the twentieth century's most powerful social movements from civil rights to environmentalism to the counterculture The study examines important leaders and institutions that embraced and put into practice a holistic vision for a peaceful healthful and just world nature writer Rachel Carson structural engineer R Buckminster Fuller civil rights leader Martin Luther King Jr Jesuit priest and paleontologist Pierre Teilhard de Chardin humanistic psychologist Abraham Maslow and the Esalen Institute and its founders Michael Murphy and Dick Price Each looked to whole systems instead of parts and focused on connections interdependencies and integration to create a better world Though the 60s dreams of creating a more perfect world were tempered by economic inequalities political corruption and deep social divisions this holistic sensibility continues to influence American culture today

### **A Fuller Explanation**

Amy C. Edmondson, 2012-12-06 In a broad sense Design Science is the grammar of a language of images rather than of words Modern communication techniques enable us to transmit and reconstitute images without the need of knowing a specific verbal sequential language such as the Morse code or Hungarian International traffic signs use international image symbols which are not specific to any particular verbal language An image language differs from a verbal one in that the latter uses a linear string of symbols whereas the former is multidimensional Architectural renderings commonly show projections onto three mutually perpendicular planes or consist of cross sections at different altitudes representing a stack of floor plans Such renderings make it difficult to imagine buildings containing ramps and other features which disguise the separation between floors consequently they limit the creativity of the architect Analogously we tend to analyze natural structures as if nature had used similar stacked renderings rather than for instance a system of packed spheres with the result that we fail to perceive the system of organization determining the form of such structures

**Useful Research** Susan Albers Mohrman, Ed Lawler, 2011-04-04 For decades there has been an ongoing at times heated debate over how relevant to real world concerns organizational research should be The contributors to this book deviate from the orthodoxy of traditional positivistic research arguing that the true test of whether knowledge is useful to practice is not whether it is rigorous but whether it is rigorous and results in improved organizational effectiveness The contributors were selected for their demonstrated ability to conduct useful research and their distinguished academic careers Part I features

researchers who describe the choices they make and the tactics they employ to ensure that their work advances both theory and practice In part II five highly respected researchers reflect on how they were able to have a broad impact on practice and still maintain academic rigor Part III describes pathways to bring academic knowledge to practice working with consultancies executive PhD programs OD specialists and professional associations as well as framing academic concepts in ways that are attention grabbing memorable and credible to practitioners Part IV looks at the prospects for doing useful research in traditional academic settings like business schools and publishing it in peer reviewed journals Finally Part V sums up the themes of the book and the challenges and opportunities facing researchers who aspire to do research that advances both theory and practice

*Pigeon Guided Missiles* James Moore, Paul Nero, 2011-08-31 During the Second World War an American behavioural psychologist working with pigeons discovered that the birds could be trained to recognise an object and to peck at an image of it when loaded into the nose cone of a missile these pecks could be translated into adjustments to the guidance fins steering the projectile to its target *Pigeon Guided Missiles* reveals this and other fascinating tales of daring plans from history destined to change the world we live in yet which ended in failure or even disaster Some became the victims of the eccentric figures behind them others succumbed to financial and political misfortune and a few were just too far ahead of their time Discover why the great groundnut scheme cost British taxpayers 49 million why the bid to build Minerva a whole new country in the Pacific Ocean sank and why the first Channel Tunnel started in 1881 over a century before the one we know today hit a dead end
