Tack, Pierre Alain Gevenois, 2007-12-31. Because of the radiation dose delivered by multidetector row CT (MDCT), it may induce cancers and the risk of death has been estimated at up to one per 1 000 examinations. Despite this, only a small proportion of referring clinicians, radiologists and technologists are aware of both the radiation risks and their underlying mechanisms. This book is designed to rectify this situation. The first part of the book provides a comprehensive approach to all the factors that influence the radiation dose and subsequently the risk induced by using MDCT in children and adult patients. In the second part, guidelines are proposed for optimization of the radiation dose in order to obtain an image quality sufficient for appropriate diagnostic performance while restricting the dose delivered. This book, written by experts of international standing, will appeal to both general and specialized radiologists, including pediatric radiologists, CT technologists, physicists, manufacturers and all professionals involved in MDCT. *Interventional Pulmonology* Felix J.F. Herth, Pallav L. Shah, Daniela Gompelmann, 2017-12-01. **Cancer Biomarkers** S. Srivastava, 2004. This special book edition of the journal *Disease Markers* concentrates on molecular biomarkers in cancer research. The main subjects of this book are: Prognostic and predictive markers in cancer; Statistical considerations in combining biomarkers for disease classification; Blood and urine markers for ovarian cancer; Use of markers for the detection and treatment of lung cancer; The promise of biomarkers in colorectal cancer detection; Development tracks for cancer prevention markers; Molecular markers for early detection of cervical neoplasia and Markers of prostate cancer detection, diagnosis and prognosis. This book contains contributions by an international board of experts on the topic. **Cell Biology, Ecology, Evolution, Genetics and Molecular Biology** Dr. Prajith P K, 2024-11-22. The study of life sciences is the foundation of our knowledge of living systems ranging from tiny cells to vast ecosystems. A thorough resource that unifies these disparate but related fields is *Cell Biology, Ecology, Evolution, Genetics and Molecular Biology*. It is designed to help researchers, teachers and students who want to grasp biological concepts holistically. The voyage starts with Cell Biology which delves into the unique structures and activities of cells which serve as the foundation of life. A strong basis for investigating biological processes is provided by

subjects including cell division signal transmission membrane dynamics and cellular organelles The book then dives into the concepts of genetic diversity inheritance DNA replication and molecular repair mechanisms in its section on genetics It connects the dots between classical genetics and contemporary developments such as polygenic inheritance gene linkage and mapping and the function of mutations in illness and evolution The main ideas are emphasized in the section on molecular biology which also describes procedures like transcription translation and gene control In order to shed light on gene expression and regulation readers will also examine cutting edge methods like PCR gel electrophoresis and the newly developing topic of epigenetics The concepts of Darwinism natural selection speciation and phylogenetics are examined in the chapter on evolution This section provides information on the evolutionary links between species including the evolution of humans and is backed by DNA data and fossil evidence Lastly ecology offers a broad viewpoint by studying species relationships population dynamics energy flow and interactions within ecosystems The delicate balance needed to support life on Earth is highlighted in this section This book acts as a link between basic ideas and more complex biological research with its straightforward language captivating graphics and real world situations It stimulates critical thinking and curiosity leading to a greater understanding of life s complex fabric
