Contemporary Perspectives on Early Childhood

Curriculum Olivia Saracho, Bernard Spodek, 2002-06-01 Over the years educational scholars have proposed different conceptions of the curriculum It is as if each scholar researcher university educator and practitioner has developed her or his own personal definition Unfortunately there is no one single definition that everybody has agreed upon Table 1 presents a sample of these definitions A universal definition for curriculum may continue to be elusive and may even change through the years to address changes in the social forces and changes in related school goals Nonetheless the approach in curriculum development is consistent Curriculum developers establish goals develop experiences designate content and evaluate experiences and outcomes Most curriculum developers consistently use such terms as curriculum planning curriculum development curriculum implementation and curriculum evaluation and many others to describe curriculum related activities Unfortunately without a consistent definition of curriculum it is difficult for the curriculum developers to identify what it is

that needs to be planned developed implemented or evaluated If curriculum developers rely on the curriculum experts definitions they will find that their definitions identify a product a program determine goals and objectives and learner experiences However its heterogeneity may be inspiring if curriculum developers rely on the components of each definition that depict the richness of the field which in turn can provide a foundation for contemporary content concepts and creativity A curriculum is an anthology of learning experiences conceived and arranged based on a program s educational goals and the community s social forces Each curriculum manifests an image of what children ought to be and become Biber 1984 p 303 grounded on the awareness of social values and a system that interprets those values into experiences for learners The concept of curriculum as a distinctive domain of study within education arose from the demand to arrange organize and translate such awareness into educational programs of study It integrates the historical study of the goals and content of schooling analyses of curriculum documents and analyses of the children s experiences in school The first formal curriculum text was published in 1918 Bobbit 1918 although in the United States contemporary curriculum study goes back to the early 1890 s when lead committees challenged the form and structure of public schooling Presently curriculum development is fundamental at all educational levels Early Childhood Education Barry Persky, Leonard H. What can postmodern perspectives offer to early childhood educators How can early childhood educators deal with the complex issues that arise in the lives of young children This book examines critical issues in early childhood education across a broad range of contexts The issues explored are critical not only in terms of being fundamental to early childhood education but also in that they present ideas and use frameworks which are not traditional to the field The topics under review include questioning the developmental basis of early childhood education and the notion of what constitutes child centred curricula and extends into a discussion of the complex nature of teacher s work in early childhood contexts which require new ways of reconceptualising the field and the role of the teacher in the lives of children The chapters explore contemporary issues using methodologies that are increasingly being favoured by teacher educators parents and community members who find that developmental perspectives do not satisfactorily explain and assist us in our interactions with young children and their families in the 21st century
