Contributions to Antarctic Research III David H. Elliot, 1992-04-08 Published by the American Geophysical Union as part of the Antarctic Research Series Volume 57 Lakes of the dry valley region near McMurdo Sound Antarctica which are perennially ice covered approximately 4 m thick and contain only microorganisms in the plankton present unique systems for studies in hydrologic optics Profiles of the flux and spectral distribution of photosynthetically available radiation 400 700 nm and the optical properties of suspended particulate material were measured for Lake Bonney and Lake Fryxell **The**

Transantarctic Mountains Gunter Faure, Teresa M. Mensing, 2010-09-21 This book presents a summary of the geology of the Transantarctic Mountains for Earth scientists who may want to work there or who need an overview of the geologic history of this region In addition the properties of the East Antarctic ice sheet and of the meteorites that accumulate on its surface are treated in separate chapters The presentation ends with the Cenozoic glaciation of the Transantarctic Mountains including the limnology and geochemical evolution of the saline lakes in the ice free valleys The subject matter in this book is presented in chronological order starting about 750 million years ago and continuing to the present time The chapters can be read selectively because the introduction to each chapter identifies the context that gives relevance to the subject matter to be discussed The text is richly illustrated with 330 original line drawings as well as with 182 color maps and photographs The book contains indexes of both subject matter and of authors names that allow it to be used as an encyclopedia of the Transantarctic Mountains and of the East Antarctic ice sheet Most of the chapters are supplemented by Appendices containing data tables additional explanations of certain phenomena e g the formation and seasonal destruction of stratospheric ozone and illustrative calculations e g ^{38}Cl dates of meteorites The authors have spent a combined total of fourteen field seasons between 1964 and 1995 doing geological research in the Transantarctic Mountains with logistical support by the US Antarctic Program Although Antarctica is remote and inaccessible tens of thousands of scientists of many nationalities and their assistants have worked there and even larger numbers of investigators will work there in the future

Contributions to Antarctic Research IV David H. Elliot, George L. Blaisdell, 1995-01-09 Published by the American Geophysical Union as part of the Antarctic Research Series Volume 67 A high amplitude magnetic anomaly occurs over the Butcher Ridge igneous complex in the Transantarctic Mountains This sill like body is approximately 10 km long where exposed It ranges from basalt to rhyolite in composition and has been suggested as evidence of a large mafic intrusion at depth A single NW SE aeromagnetic profile flown across Butcher Ridge gave an 8 km wide positive anomaly with maxima of about 700 and 1000 nT which are associated with topographic peaks that the aircraft cleared at about 300 and 600 m respectively The observed amplitude of the Butcher Ridge anomaly is too great to be caused by a typical sill of Ferrar Dolerite examples of which are widely exposed along the Transantarctic Mountains Models that fit the observed data indicate magnetizations comparable to the Jurassic Dufek layered mafic intrusion in the Transantarctic Mountains near the Weddell

Sea Model calculations show that the upper and most magnetic part of the inferred intrusion must be greater than about 2 km thick and that the entire intrusion is probably substantially thicker. We interpret the source of the Butcher Ridge magnetic anomaly to be a layered mafic intrusion syntectonic with the Jurassic Transantarctic failed rift marked by the Ferrar Dolerite. The magnetic evidence for a buried mafic body beneath the Butcher Ridge igneous complex is the first evidence of possible Jurassic cumulate rocks in the Transantarctic Mountains bordering the Ross Embayment Byrd Subglacial Basin. Antarctic Meteorology and Climatology David H. Bromwich, Charles R. Stearns, 1993-01-11 Provides examples of applications of state of the art technology to fundamental problems in collecting and analyzing meteorological and climatological data for the Antarctic continent. **Contribution from the Scripps Institution of Oceanography** Scripps Institution of Oceanography, 1976 Reprints from various publications. **Polychaeta Errantia of Antarctica** Olga Hartman, 1991-01-08 Published by the American Geophysical Union as part of the Antarctic Research Series Volume 3 This handbook dealing with the Polychaeta Errantia of the Antarctic is the first of two parts the second part will deal with the Polychaeta Sedentaria Together the two books contain basic information on all Antarctic polychaetes included are all known records south of the fiftieth parallel and some farther north into sub Antarctic areas Generally Gough Island Tristan da Cunha and some other islands south of New Zealand have not been included. *Bulletin of the Atomic Scientists*, 1970-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world. *Glaciological Data* World Data Center A for Glaciology, 1977. **Antarctic Journal of the United States**, 1992. **Delineation Drilling Activities in Federal Waters Offshore, Santa Barbara County**, 2001. *Climate Change and Marine and Freshwater Toxins* Luis M.
