Thomist increasingly admired the ideas of Teilhard de Chardin to the point that she incorporated his ideas into her last six short stories in the collection *Everything That Rises Must Converge*. The volume begins with a detailed introduction to the short story genre and concludes with an annotated bibliography of major works on short story theory.

Mapping Scientific Method Gita Chadha, Renny Thomas, 2022-07-19. This volume explores how the scientific method enters and determines the dominant methodologies of various modern academic disciplines. It highlights the ways in which practitioners from different disciplinary backgrounds—the humanities, the natural sciences, and the social sciences—engage with the scientific method in their own disciplines. The book maps the discourse within each of the disciplines that critiques the scientific method from different social locations in order to argue for more complex and nuanced approaches in methodology. It also investigates the connections between the method and the structures of power and domination which exist within these disciplines. In the process, it offers a new way of thinking about the philosophy of the scientific method. Part of the Science and Technology Studies series, this volume is the first of its kind in the South Asian context to debate scientific methods and address questions by scholars based in the global south. It will be useful to students and practitioners of science, humanities, social sciences, philosophy of science, and philosophy of social science. Research scholars from these disciplines, especially those engaging in interdisciplinary research, will also benefit from this volume.

The Reading of Theoretical Texts Peter Ekegren, 2002-01-04. Since the structuralist debates of the 1970s, the field of textual analysis has largely remained the preserve of literary theorists. Social scientists, while accepting that observation is theory-laden, have tended to take the meaning of texts as given and to explain differences of interpretation either in terms of ignorance or bias. In this important contribution to methodological debate, Peter Ekegren uses developments within literary criticism, philosophy, and critical theory to reclaim this study for the social sciences and to illuminate the ways in which

different readings of a single text are created and defended *Susan Sontag* Leland Poague, Kathy A.
