Corporeal Turn Passion Necessity Politics:

The Corporeal Turn John Tambornino, 2002 In *The Corporeal Turn* political theorist John Tambornino offers a thorough rethinking of ethical and political theory by emphasizing human embodiment and the primacy of passion and need in response to the neglect of these matters in much of contemporary thought Tambornino calls for a corporeal turn or as he explains sustained attention to human embodiment something that is often occluded when priority is given to reason or language Working through a diverse set of thinkers exploring such themes as necessity and freedom need and desire nature and convention and public and private and noting vivid instances of politicized embodiment Tambornino takes seriously Nietzsche's claim that philosophy has largely been an interpretation and misunderstanding of the body The result is nothing less than a new orientation to ethical and political theory one that appreciates the complex relations of language politics culture and corporeality and a powerful intervention into those domains [Traveling Back](#) Susan McWilliams, 2014-03 What does it mean to think globally Susan McWilliams argues that to understand politics in our new world we should revisit one of the oldest themes in political theory travel This title uncovers the rich travel story tradition of political theorizing and shows how it helps to answer today's toughest political questions **The Naked Truth** Alys X. George, 2022-01-21 In the popular imagination turn of the century Vienna is a cerebral place marked by Freud the discovery of the unconscious and the advent of high modernist culture But as historian Alys George argues this stereotype of Viennese Modernism as essentially heady overlooks a rich cultural history of the body in the period Spanning 1870 to 1930 *The Naked Truth* is an interdisciplinary tour de force that recasts the visual literary and performative cultures of the era and offers an alternative genealogy of this fascinating moment in the history of the West Starting with the Second Vienna Medical School and its innovations in anatomy and pathology George traces an emerging culture of bodily knowledge by analyzing a variety of written and visual media including theater and dance and by drawing connections between scientific and artistic discourses Paying equal attention to both low and high culture bringing gender and class issues back to the fore and highlighting the role of female thinkers and writers George's book makes a signal contribution to our understanding of late nineteenth and early twentieth century Viennese and European culture *The Naked Truth* shows us that the inward turn cannot be understood until it is set against the backdrop of a culture obsessed with exploring and displaying humanity in its embodied carnal form *Central Works of Philosophy, Volume 5* John Shand, 2005 Volume 1 gives readers a deep understanding of the contribution that the ancient Greek and medieval philosophers have made to contemporary philosophical debate From Plato to William of Ockham the philosophical texts covered offer a remarkable insight into a world out of which our present way of thinking emerged *Disability and Christian Theology Embodied Limits and Constructive Possibilities* Deborah Beth Creamer, 2009-01-05 Attention to embodiment and the religious significance of bodies is one of the most significant shifts in contemporary theology In the midst of this however experiences of disability have received little attention This book explores possibilities

for theological engagement with disability focusing on three primary alternatives challenging existing theological models to engage with the disabled body considering possibilities for a disability liberation theology and exploring new theological options based on an understanding of the unsurprisingness of human limits The overarching perspective of this book is that limits are an unavoidable aspect of being human a fact we often seem to forget or deny Yet not only do all humans experience limits most of us also experience limits that take the form of disability at some point in our lives in this way disability is more normal than non disability If we take such experiences seriously and refuse to reduce them to mere instances of suffering we discover insights that are lost when we take a perfect or generic body as our starting point for theological reflections While possible applications of this insight are vast this work focuses on two areas of particular interest theological anthropology and metaphors for God This project challenges theology to consider the undeniable diversity of human embodiment It also enriches previous disability work by providing an alternative to the dominant medical and minority models both of which fail to acknowledge the full diversity of disability experiences Most notably this project offers new images and possibilities for theological construction that attend appropriately and creatively to diversity in human embodiment Essays on

Neuroscience and Political Theory F. Vander Valk, 2013-03-01 The past 20 years have seen increasingly bold claims emanating from the field of neuroscience Advances in medical imaging brain modelling and interdisciplinary cognitive science have forced us to reconsider the nature of social cultural and political activities This collection of essays is the first to explore the relationship between neuroscience and political theory with a view to examining what connections can be made and which claims represent a bridge too far The book is divided into three parts Part I places neuroscience as a social and political practice into historical context Part II weaves together the insights from contemporary neuroscience with the wisdom of major figures in the history of political thought Part III considers how neuroscience can inform contemporary debates about a range of issues in political theory This work brings together scholars who are sceptical about the possibility of integrating neuroscience and political theory with proponents of a neuroscience informed approach to thinking about political and social life The result is a timely and wide ranging collection of essays about the role that our brain might play in the life of the body politic It should be essential reading for all those with an interest in the cutting edge of political theory

The Quantified Self in Precarity Phoebe V. Moore, 2017-09-11 Humans are accustomed to being tool bearers but what happens when machines become tool bearers calculating human labour via the use of big data and people analytics by metrics The Quantified Self in Precarity highlights how whether it be in insecure gig work or office work such digitalisation is not an inevitable process nor is it one that necessarily improves working conditions Indeed through unique research and empirical data Moore demonstrates how workplace quantification leads to high turnover rates workplace rationalisation and worker stress and anxiety with these issues linked to increased rates of subjective and objective precarity Scientific management asked us to be efficient Now we are asked to be agile But what does this mean for the everyday lives we lead

With a fresh perspective on how technology and the use of technology for management and self management changes the quantified precarious workplace today *The Quantified Self in Precarity* will appeal to undergraduate and postgraduate students interested in fields such as Science and Technology Organisation Management Sociology and Politics

Corporeality, Medical Technologies and Contemporary Culture Francisco Ortega, 2013-12-17 This book examines the confusions and contradictions that manifest in prevalent attitudes towards the body as well as in related bodily practices The body is simultaneously our reference for the certainties of nature and the locus of a desire for transformation and reinvention The body is at the same time worshipped and despised an object of desire and of design Francisco Ortega analyses how the body has become both a screen for the projection of our ideas and imaginings about ourselves and conversely an object of suspicion anxiety and discomfort Addressing practices of corporeal ascesis such as bodybuilding and dietetics medical technologies and radical anatomical modifications Ortega documents the ambiguous legacy of a western theoretical tradition that has always despised the body Utilising a theoretical framework that is mainly informed by the phenomenology of the body feminist theory disability studies and the thought of Michel Foucault *Corporeality Medical Technologies and Contemporary Culture* address several ethical and psychological issues associated with the experience and perception of the body in our cultural landscape Drawing on these diverse areas of philosophical and analytical work this book will interest those researching Law Medicine and Sociology

Embodied Learning in Educational Theatre Nancy Smithner, 2025-04-29 This book explores embodied teaching practices through applied and physical theatre drawing extensively on the author's rich experience teaching in diverse urban environments including schools colleges and prison settings It presents a groundbreaking conceptualization of embodied practice aimed at fostering personal and social growth through educational theatre Each chapter delves into theories of social transformation supported by qualitative data from student reflections to provide both theoretical and practical insights These insights illustrate how physicalized pedagogy can be effectively used to engage students with socially transformative ideas and identities It also emphasizes the significant role of the facilitator in this process highlighting how they can create an environment that fosters ethical and multicultural awareness in both formal educational settings such as classrooms and informal settings like community workshops By promoting an ethos of inclusivity and ethical consideration it argues that facilitators can help students navigate and engage with complex social issues through the medium of theatre An accessible and compelling text it aims to inspire educators to adopt innovative methods that promote deeper engagement and understanding among students

Central Works of Philosophy v5 John Shand, 2014-12-18 *Central Works of Philosophy* is a major multi volume collection of essays on the core texts of the Western philosophical tradition From Plato's *Republic* to the present day the five volumes range over 2 500 years of philosophical writing covering the best most representative and most influential work of some of our greatest philosophers Each essay has been specially commissioned and provides an overview of the work clear and authoritative exposition of its

central ideas and an assessment of the work's importance. Together these books provide an unrivaled companion for studying and reading philosophy, one that introduces the reader to the masterpieces of the western philosophical canon. This volume covers the central texts in the history of analytic philosophy from Quine's *Word and Object* (1960) to the present day. The texts range over political philosophy, ethics, metaphysics, and the philosophies of language, mind, and logic, and represent some of the most important philosophical work of the last forty years. Students and non-specialists who may find the technicality of some of the texts forbidding will welcome the clarity of exposition and exegesis that the essays provide. Taken together, the essays provide both a map and compass for the current philosophical landscape and will prove a valuable resource not only for undergraduate and postgraduate philosophy students but for teachers and researchers in allied disciplines who need an understanding of the preoccupations of contemporary philosophy.

The State of Speech Joy Connolly, 2013-12-01

Rhetorical theory, the core of Roman education, taught rules of public speaking that are still influential today. But Roman rhetoric has long been regarded as having little important to say about political ideas. *The State of Speech* presents a forceful challenge to this view. The first book to read Roman rhetorical writing as a mode of political thought, it focuses on Rome's greatest practitioner and theorist of public speech, Cicero. Through new readings of his dialogues and treatises, Joy Connolly shows how Cicero's treatment of the Greek rhetorical tradition's central questions is shaped by his ideal of the republic and the citizen. Rhetoric, Connolly argues, sheds new light on Cicero's deepest political preoccupations: the formation of individual and communal identity, the communicative role of the body, and the unmanly aspects of politics, especially civility and compromise. Transcending traditional lines between rhetorical and political theory, *The State of Speech* is a major contribution to the current debate over the role of public speech in Roman politics. Instead of a conventional top-down model of power, it sketches a dynamic model of authority and consent enacted through oratorical performance, and examines how oratory modeled an ethics of citizenship for the masses as well as the elite. It explains how imperial Roman rhetoricians reshaped Cicero's ideal republican citizen to meet the new political conditions of autocracy and defends Ciceronian thought as a resource for contemporary democracy.

Performance Affects J. Thompson, 2009-04-28

Performance Affects explores performance projects in disaster and war zones to argue that joy, beauty, and celebration should be the inspiration for the politics of community-based or participatory performance practice, seeking to realign the field of Applied Theatre away from effects towards an affective role connected to sensations of pleasure.

The Body Lisa Blackman, 2008-09-15

Questions around the body are central to social theory. *The Body* highlights and analyses the debates which make the body central to current sociological, psychological, cultural, and feminist thinking.

Emotions and Leadership Neal M. Ashkanasy, Wilfred J. Zerbe, Charmine E. J. Härtel, 2019-08-26

This volume of *Research on Emotion in Organizations* contributes to the ongoing research on emotions within organizational leadership through a three-level analysis focusing on leadership and individual team members' leadership and its effects on the team construct and leadership in the overall context of organizations and

culture Affective intimacies Marjo Kolehmainen, Annukka Lahti, Kinneret Lahad, 2022-07-19 This volume provides a novel platform to re evaluate the notion of open ended intimacies through the lens of affect theories Contributors address the embodied affective and psychic sensorial and embodied aspects of their ongoing intimate entanglements across various timely phenomena This fascinating collection asks how the study of affect enables us to rethink intimacies what affect theories can do to the prevailing notion of intimacy and how they renew and enrich theories of intimacy in a manner which also considers its normative and violent forms This collection brings together a selection of original chapters which invite readers to rethink such concepts as care closeness and connectivity through the notion of affective intimacies Based on rigorous research it offers novel insights on a variety of themes from austerity culture to online discussions on regretting motherhood from anti ableist notions of health to teletherapies in the era of COVID 19 and from queer intimacies to critiques of empathy Lively and thought provoking this collection contributes to timely topics across the social sciences representing multiple disciplines from gender studies sociology and cultural studies to anthropology and queer studies By so doing it advances the value of interdisciplinary perspectives and creative methodologies for understanding affective intimacies

Problems of Living Dan J. Stein, 2021-05-11 Problems of Living Perspectives from Philosophy Psychiatry and Cognitive Affective Science addresses philosophical questions related to problems of living including questions about the nature of the brain mind reason and emotion happiness and suffering goodness and truth and the meaning of life It draws on critical pragmatic and embodied realism as well as moral naturalism and brings arguments from metaphysics epistemology and ethics together with data from cognitive affective science This multidisciplinary integrated approach provides a novel framework for considering not only the nature of mental disorders but also broader issues in mental health such as finding pleasure and purpose in life Draws on the strongest aspects of polar positions in philosophy and psychiatry to help resolve important perennial debates in these fields Explores continuities between early philosophical work and current cognitive affective sciences including neuroscience and psychology Employs findings from modern cognitive affective science to rethink key long standing debates in philosophy and psychiatry Builds on work showing how mind is embodied in the brain and embedded in society to provide an integrated conceptual framework Assesses both the insights and the limitations of cognitive affective science for addressing the big questions and hard problems of living *Corporal Compassion* Ralph R. Acampora, 2019-11-21 Most approaches to animal ethics ground the moral standing of nonhumans in some appeal to their capacities for intelligent autonomy or mental sentience Corporal Compassion emphasizes the phenomenal and somatic commonality of living beings a philosophy of body that seeks to displace any notion of anthropomorphic empathy in viewing the moral experiences of nonhuman living beings Ralph R Acampora employs phenomenology hermeneutics existentialism and deconstruction to connect and contest analytic treatments of animal rights and liberation theory In doing so he focuses on issues of being and value and posits a felt nexus of bodily being termed symphysis to devise an interspecies ethos

Acampora uses this broad based bioethic to engage in dialogue with other strains of environmental ethics and ecophilosophy Corporal Compassion examines the practical applications of the somatic ethos in contexts such as laboratory experimentation and zoological exhibition and challenges practitioners to move past recent reforms and look to a future beyond exploitation or total noninterference a posthumanist culture that advocates caring in a participatory approach

Non-Representational Geographies of Therapeutic Art Making Candice P. Boyd, 2016-11-26 Utilising non representational theories and practice led research methods this book serves to reclaim therapeutics as ecological spatial and material It examines the sites and performances of a wide range of therapeutic art practices including painting and drawing dance movement therapy fibre art subterranean graffiti practice and poetic permaculture In doing so it provides an important assessment of the role and status of therapy in contemporary life A highly interdisciplinary text Boyd s research is informed by a thorough reading of post structural theory including contemporary feminism Guattari s ethico aesthetic paradigm Whitehead s process oriented ontology and Deleuze s writing on sense and the event This innovative study will prove essential for scholars and practitioners of cultural geography socially engaged art therapeutic studies and occupational therapy

War and the Body Kevin McSorley, 2013-01-25 This edited volume places the body at the centre of critical thinking about war and its consequences War is fundamentally embodied The reality of war is not just politics by any other means but politics incarnate politics written on and experienced through the thinking feeling bodies of men and women From steeled combatants to abject victims war occupies innumerable bodies in a multitude of ways profoundly shaping lives and ways of being human Giving the body an analytic recognition that it warrants and has often been denied in conventional war studies this book brings together new interdisciplinary scholarship that explores the numerous affective sensory and embodied practices through which war lives and breeds It focuses on how war is prepared enacted and reproduced through embodied action suffering and memory As such the book promotes new directions in theorising war and transformations in warfare via an explicit focus on the body This book will be of much interest to students and scholars of war studies security studies sociology anthropology military studies politics and IR in general

Performance and Politics in a Digital Populist Age Cami Rowe, 2022-12-30 This book re evaluates the role of performance in global politics in the face of populism and the digital mediatization of political interactions As political communications are increasingly conducted in online environments post truth performances become evermore central to democratic processes It is therefore essential to reconsider the political potency of performance and theatricality in order to effectively reinvigorate democracy in the 21st century Drawing on applied theatre practices this book shows that performance is inherently concerned with cooperative and collaborative encounters across difference and performance might therefore support effective responses to digital populism The analysis addresses the performative aspects of populist political movements in the United States and United Kingdom The chapters engage with aspects of performance and theatricality not commonly broached in IR scholarship including interpersonal

engagement creative embodiment and interactive affect making the case for the importance of these features to democratic engagement This book resonates with recent debates regarding the relevance and treatment of Arts and Performance as IR subjects methodologies and practices and will be of interest to scholars and students of global politics international relations performance studies radical democracy and mass communication and culture
