A Century Of Science And Other Essays:

A Century of Science John Fiske, 1899 [A Century of Science, and Other Essays](#) John Fiske, 2019-11-27 In *A Century of Science and Other Essays* John Fiske meticulously examines the profound impact of scientific advancements on society throughout the 19th century. With a keen analytical approach, Fiske combines historical detail and philosophical inquiry, presenting essays that reflect his belief in the progressive nature of human knowledge. The literary style oscillates between rigorous argumentation and engaging prose, bringing forth a nuanced reflection on themes such as evolution, natural selection, and the interplay of science and culture, while situated within the broader context of the Enlightenment's emphasis on empiricism and rational thought.

John Fiske (1842–1901), a prominent American philosopher, historian, and advocate of Darwinian thought, was profoundly influenced by the scientific debates of his time. His academic background in philosophy and his commitment to promoting scientific literacy were pivotal as he sought to reconcile emerging scientific theories with contemporary societal values. Fiske's deep recognition of the transformative power of science fueled his desire to articulate its significance, bridging the gap between complex scientific theories and the lay audience. This compelling collection is essential for scholars and enthusiasts alike, as Fiske's insights illuminate the intricate fabric of 19th-century intellectual thought. Readers are invited to explore the essays that not only document the legacy of scientific inquiry but also challenge them to consider the ongoing evolution of understanding in the face of modern scientific advancements.

[A Century of Science and Other Essays](#) Fiske, John, 2016-06-23 Unlike some other reproductions of classic texts (1) We have not used OCR (Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches, etc., we have endeavoured to keep the quality of these images so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

A century of science and other essays John Fiske, 1902 **The Writings of John Fiske ...: A century of science and other essays** John Fiske, 1902 [A Century of Science](#) John Fiske, 1900 [A Century of Science and Other Essays, by John Fiske](#) John Fiske, 1900 **A Century of Science** John Fiske, 2020-04-20 In the course of the year 1774 Dr Priestley found that by heating red precipitate (or what we now call red oxide of mercury) a gas was obtained which he called dephlogisticated air, or in other words, air deprived of phlogiston and therefore incombustible. This incombustible air was oxygen, and such was man's first introduction to the mighty element that makes one fifth of the atmosphere in volume and eight ninths of the ocean by weight, besides forming one half of the earth's solid crust and supporting all fire and all life.
