Bettio, Alina Verashchagina, 2009-11-24 Gender is now recognized as a fundamental organizing principle for economic as well as social life and related research has grown at an unprecedented pace in the recent decades across branches of economics. The volume takes stock of this research, proposes novel analytical frameworks and outlines further research directions. It grew out of the Summer School of International Research in Pontignano University of Siena that traditionally brings together the most representative scholars in the chosen field. The thirteen essays included in the volume cover recent advances in gender-related issues across disciplinary branches from Economic History and the History of Economic Thought to Macroeconomics, Household Economics, the Economics of Care Work, Labour Economics, Institutional and Experimental Economics. The volume is primarily addressed to graduate students in Economics and is an essential companion for researchers in the area of Gender Economics. As most essays are written in a non-technical language, it is also of interest to a wider audience including specialists in Sociology, Demography and History. Companion to Women's Historical Writing M. Spongberg, A. Curthoys, B. Caine, 2016-04-30 This A-Z reference work provides the first comprehensive reference guide to the wide range of historical writing with which women have been involved, particularly since the Renaissance. The Companion covers biographical writing, travelogue and historical fictions, broadening the concept of history to include the forms of writing with which women have historically engaged. The focus is on women writing in English internationally, but historical and historiographical traditions from beyond the English-speaking world are also examined. Brief biographies of individual writers are included. **Charlotte Perkins Gilman** Gillian Niebrugge-Brantley, 2018-12-13 Charlotte Perkins Gilman 1860-1935 is one of the most important women contributors to classical sociology, primarily because of the originality and significance of her theoretical work. Although well known to her contemporaries in both the United States and Europe, Gilman's legacy was not fully acknowledged by sociologists until her work was recently rediscovered under the impetus of second-wave feminist scholarship. Gilman's overarching accomplishment as a sociologist was to formulate a still unparalleled conception of gender. She was both the first theorist to separate gender as socially constructed behavior from biological sex and to treat it as a significant variable in social analysis, and the first to create a general theory of society in which gender stratification serves as the foundational principle. She also offered important ideas for the sociological subfields of economy, work, culture and family, presenting her arguments in a variety of forms: formal theory, verse, essays, public lectures, novels and short stories. The essays selected for this volume feature essays of interest to sociologists from across a spectrum of disciplines: economics, literature, women's studies, philosophy and history, as well as sociology. The essays are arranged thematically, with sections on gender and society, economy and society, methodology, the public role of the sociologist, towards a sociology of women and race, class and gender. **Guide to Reference in Genealogy and Biography** Mary K. Mannix, Fred Burchsted, 2015-01-14 Profiling more than 1400 print and electronic sources, this book helps connect librarians and researchers to the most relevant sources of information in genealogy and biography. **Routledge Handbook of the**

History of Women's Economic Thought Kirsten Madden, Robert W Dimand, 2018-10-03 The marginalization of women in economics has a history as long as the discipline itself Throughout the history of economics women contributed substantial novel ideas methods of inquiry and analytical insights with much of this discounted ignored or shifted into alternative disciplines and writing outlets This handbook presents new and much needed analytical research of women's contributions in the history of economic thought focusing primarily on the period from the 1770s into the beginning of the 21st century Chapters address the institutional sociological and historical factors that have influenced women economists thinking and explore women's contributions to economic analysis method policies and debates Coverage is international moving beyond Europe and the US into the Arab world China India Japan Latin America Russia and the Soviet Union and sub Saharan Africa This new global perspective adds depth as well as scope to our understanding of women's contribution to the history of economic thought The book offers crucial new insights into previously underexplored work by women in the history of economic thought and will prove to be a seminal volume with relevance beyond that field into women's studies sociology and history

Slavery, Capitalism, and Women's Literature Kristin Allukian, 2023-08 With Slavery Capitalism and Women's Literature Kristin Allukian makes an important contribution to slavery and capitalism scholarship by including the voices of some of the best known nineteenth century American women writers Women's literature offers crucial and previously unconsidered economic insights into the relationship between slavery and capitalism different from those we typically find in economics and economic histories Allukian demonstrates that because women's imaginative and creative texts take the material historical connection of slavery and capitalism as their starting point they can be read for the more speculative extensions of that connection extensions not possible to discover on a material historical level Indeed Allukian contends these authors and texts disclose unique economic insights critiques and theories in ways that are only possible through literary writing The writers featured in this study Harriet Beecher Stowe Lucy Larcom Harriet Jacobs and Frances Ellen Watkins Harper published written accounts of the continuities between slavery and capitalism including between language and activism accounting and sentimentalism labor and technology race and property and inheritance and reparations Their essays novels poems and autobiographies provided forums to document data stimulate debate generate resistance and imagine alternatives to the United States developing capitalist economy engined and engineered by slavery Without their unique economic insights the national narrative we tell about the relationship between slavery and capitalism is incomplete

The Elgar Companion to the Chicago School of Economics Ross B. Emmett, 2010-01-01 Many know the Chicago School of Economics and its association with Milton Friedman George Stigler Ronald Coase and Gary Becker But few know the School's history and the full scope of its scholarship In this Companion leading scholars examine its history and key figures as well as provide surveys of the School's contributions to central aspects of economics including price theory monetary theory labor and economic history The volume examines the School's traditions of applied welfare theory and law

and economics while providing a glimpse into emerging research on Chicago's role in the development of neoliberalism. A companion in the true sense of the word, this volume surveys a wide body of Chicago economic studies and guides readers carefully through each. The Companion offers biographies of leading Chicago economists and evaluations of the School's connection to approaches to economics that draw from and complement the School, including the Virginia School and the work of Armen Alchian and Edward Lazear. Moreover, this book is a first in many respects as it analyzes the interconnections of the Chicago School's theory, methodology, and policy and considers by what means and ideas the School's policy framework is driven. The breadth and depth of the insights presented here will appeal especially to students and scholars of economics and historians interested in economics, social science, and applied public policy.

[Advancing the Frontiers of Heterodox Economics](#) Tae-Hee Jo, Zdravka Todorova, 2015-07-30. This collection of essays honors the life and work of one of the most prominent and fervent heterodox economists, Frederic S. Lee, who has been at the heart of the heterodox economics movements for the past three decades. Authors in this book demonstrate that heterodox economic has transcended the criticism of mainstream economics and more importantly that constructive developments are in the making by way of cross communications among various heterodox economics traditions. Frederic S. Lee's contributions to heterodox economics are centered on three themes: the making of a history and identity of heterodox economics, heterodox microeconomics, and the heterodox analysis of social provisioning. Part I addresses the importance of history, theory, research methods, and institutions in the making of the identity of heterodox economics as an alternative to mainstream economics. Part II delves into heterodox microeconomic theories in particular investment, pricing, competition, markets, and market governance as foundations of heterodox macroeconomic analyses. Part III expands the analysis of the capitalist social provisioning process with an emphasis on its subsystems and their relationships over historical time. Part IV encapsulates the life and work of Frederic S. Lee. Throughout his intellectual life, Frederic S. Lee has shown to many that the development of heterodox economics is rendered possible by unselfish and ceaseless efforts to build both theory and institutions. Essays in this book attest that establishing an alternative critical theory to the status quo is not only possible but also serviceable to the majority of the population.
