Studying Teachers in Early Childhood Settings Bernard Spodek, Olivia Saracho, 2003-05-01 The chapters in this volume reflect the impact that teachers have on their students when they stand in front of the classroom and the effect their performance have on children such as teachers gender preparation certification knowledge beliefs cognitive style creativity accountability and other actions on the part of the teachers They describe research related to the preparation and certification or credentialing of early childhood practitioners the issues regarding the nature of early childhood practice and the needs of the field as it prepares for the future **Contemporary Perspectives on Early Childhood Curriculum** Olivia Saracho, Bernard Spodek, 2002-06-01 Over the years educational scholars have proposed different conceptions of the curriculum It is as if each scholar researcher university educator and practitioner has developed her or his own personal definition Unfortunately there is no one single definition that everybody has agreed upon Table 1 presents a sample of these definitions A universal definition for curriculum may continue to be elusive and may even change through the years to address changes in the social forces and changes in related school goals Nonetheless the approach in curriculum development is consistent Curriculum developers establish goals develop experiences designate content and evaluate experiences and outcomes Most curriculum developers consistently use such terms as curriculum planning curriculum development curriculum implementation and curriculum evaluation and many others to describe curriculum related activities Unfortunately without a consistent definition of curriculum it is difficult for the curriculum developers to identify what it is that needs to be planned developed implemented or evaluated If curriculum developers rely on the curriculum experts definitions they will find that their definitions identify a product a program determine goals and objectives and learner experiences However its heterogeneity may be inspiring if curriculum developers rely on the components of each definition that depict the richness of the field which in turn can provide a foundation for contemporary content concepts and creativity A curriculum is an anthology of learning experiences conceived and arranged based on a program's educational goals and the community's social forces Each curriculum manifests an image of what children ought to be and become Biber 1984 p

303 grounded on the awareness of social values and a system that interprets those values into experiences for learners The concept of curriculum as a distinctive domain of study within education arose from the demand to arrange organize and translate such awareness into educational programs of study It integrates the historical study of the goals and content of schooling analyses of curriculum documents and analyses of the children s experiences in school The first formal curriculum text was published in 1918 Bobbit 1918 although in the United States contemporary curriculum study goes back to the early 1890 s when lead committees challenged the form and structure of public schooling Presently curriculum development is fundamental at all educational levels Contemporary Perspectives On Early Childhood Education Yelland, Nicola,2010-03-01 This book considers and interrogates a range of new and critical issues in contemporary early childhood education It discusses both fundamental and emerging topics in the field and presents them in the context of reflective and contemporary frameworks Contemporary Perspectives on Research on Immigration in Early Childhood Education Olivia Saracho,2023-06-01 Immigration is when individuals leave their country of residency to permanently settle in a different country According to the United Nations UN Department of Economic and Social Affairs in 2017 a cumulative of 258 million persons were residents in a country that differed from their own The September 11 2001 terrorist attacks and the increase in prohibited immigration impelled the United States US to propose a number of immigration laws In 2012 the US Department of Homeland Security DHS established the Deferred Action for Childhood Arrivals DACA policy which allowed undocumented immigrants to work legally without being deported as long as they maintain a useful and lawful status Approximately 800 000 immigrants attained DACA standing permitting them to legally work and go to school in the US Furthermore the immigration law of 1965 prompted an excessive entrance of multicultural immigrants to the United States which brought about a great representation of children who live with immigrant families These children faced several environmental structures which were affected by changes and multiplicity in their family situations Immigrant children attempted to understand a different culture values and emerging issues in relation to their assimilation paths The purpose of this volume is to offer a complete representation of the way immigrant children and families respond and develop in the US and Europe It will extend current knowledge and reinforce contemporary frameworks that associate the cultural differences between immigrant families and teachers In the classroom environment teachers have the opportunity to effectively assume both nurturing and instructional roles to aid young children to cultivate their social and cognitive abilities The teachers personal characteristics formal education specialized training and cultural knowledge may affect their effectiveness in the classroom environment Most of the studies show that both family and teachers have the most significant effects on the children s development and learning Immigration researchers and scholars were invited to review critically analyze discuss and submit a manuscript for the volume titled Contemporary Perspectives on Research on Immigration in Early Childhood Education The concept of immigration has heavily influenced modern views in early childhood education Researchers scholars and educators need to

understand the current sources based on theoretical frameworks that contribute to the purposes of immigration in the United States and Europe The contents of the volume reflect the major shifts in the views of early childhood researchers scholars and educators in relation to the research on immigration its historical roots the role of immigration in early childhood education and its relationship to theory research and practice Childhood Chris Jenks,2005 Childhood is an extremely complex and highly contested concept It refers to a life phase as well as to the age group defined as children but is also a cultural construction part of the social and economic structure of communities The key scholarship collected introduced and reprinted in these volumes reflects this complexity and introduces the reader to the wide variety of interpretations that have been and continue to be placed on it It might be suggested that the push or initiative in theorizing childhood has derived from advances within sociology and anthropology However the future provides potential for interdisciplinary study which this collection also reflects The contemporary study of childhood must comprise a conjoining of disciplines sociology anthropology psychology social geography history philosophy and socio legal theory all have something to add to the field and are represented within the collection Childhood Poverty Oxford Department of International Development,2011-12-13 EPUB

Children and Borders S. Spyrou,M.
