Contract Scaffolding:

Contract Scaffolding Robert Bartlett, 1999 **The JCT 05 Standard Building Sub-Contract** Peter Barnes, 2008-04-15

Although the majority of construction work these days is carried out by sub contractors there are surprisingly few books dealing with building sub contracts and the related law. This book provides a much welcomed guide to the new 2005 JCT Standard Building Sub Contract SBC Sub and SBC Sub D which is likely to be the regular sub contract form used by contractors when letting works under the radically revised 2005 JCT Standard Building Contract. Peter Barnes, who has over 30 years experience of contractor sub contractor relationships, provides a clause by clause commentary on the sub contract highlighting practical issues and considering relevant case law. The book will be of interest not only to sub contractors and main contractors but also to other construction professionals and lawyers who need an understanding of the contractual relationship and allocation of risk between contractors and sub contractors. The Author Peter Barnes MSc Construction Law and Arbitration DipICarb FCIOB FCI Arb MRICS is a Chartered Arbitrator, a registered adjudicator and a CI Arb trained mediator. He has been actively involved in the construction industry for almost 30 years and has a wide experience of many types of construction work including building both new build and refurbishment, civil engineering and mechanical and electrical installations. He spent many years working for main contractors undertaking both surveying and management roles and during that time he has administered and settled a multitude of sub contract accounts on a variety of different contracts. His experience with sub contracts covers both simple and complex contracts and has involved detailed examination of contractual entitlements. His practical background has led to an in depth understanding of the allocation of risks in contractor sub contractor relationships. Since becoming a consultant Peter Barnes has represented many parties in both adjudications and arbitrations, has acted as an expert witness in respect of both liability and quantum and has been appointed as adjudicator by both the Chartered Institute of Arbitrators and the Construction Industry Council. His wide experience base has led to him being appointed to the committees of the Chartered Institute of Building Eastern Branch, the Chartered Institute of Arbitrators East Anglia Branch and the Institution of Civil Engineering Surveyors Anglia and Central Branch. Estimating for Building & Civil Engineering Work John Williams, Spence Gedes, 2013-02-01 It deals in a practical and reasonable way with many of the

estimating problems which can arise where building and civil engineering works are carried out and to include comprehensive estimating data within the guidelines of good practice The early part of the book has been completely rewritten to contain chapters useful to students and practitioners alike for the development of the estimating process resulting in the presentation of a tender for construction works The second and major part of the book contains estimating data fully updated for the major elements in building and civil engineering work including a new chapter on piling and a wealth of constants for practical use in estimating The estimating examples are based on the current edition of the Standard Method of Measurement for Building Works SMM7 The comprehensive information on basic principles of estimating found in Spence Geddes are still as valid today as the first edition In this edition the prevailing rates of labour and costs of materials are taken whenever possible as a round figure Readers will appreciate in the construction industry that prices are continually changing rise and fall and that worked examples should therefore be used as a guide to method of calculation substituting in any specific case the current rates applicable to it In the case of plant output dramatic increases have been experienced in productivity over recent years and again estimators with their own records should substitute values appropriate to their work
