Bulletin United States. Bureau of Mines,1981 **Copper: The Next Fifteen Years** W. Gluschke,J. Shaw,B. Varon,1978-12-31 This book has its origins in a resolution passed by the Economic and Social Council of the United Nations in July 1975 requesting the Secretary General to prepare a 10 to 15 year evaluation of the prospects for copper The investigation was carried out by the Centre for Natural Resources Energy and Transport with the help of consultants and the results summarized in a report submitted to the Committee on Natural Resources a subsidiary body of the Economic and Social Council in May 1977 This book presents the findings of that investigation in greater detail draws out the implications of those findings more fully and describes the methodology employed more completely than was possible in the earlier report It also incorporates the results of additional work carried out by the authors since the spring of 1977 so as to take into account recent developments as well as comments received from the participants at the meeting of the Committee on Natural Resources where the summary paper was reviewed Although all three authors are collectively and individually responsible for the whole book Mr Wolfgang Gluschke assumes a special responsibility for Chapters IV V and VI Mr Joseph F Shaw for Chapters I II and VIII and Mr Benson Varon for Chapters III and VII The work on the book was undertaken under the general supervision and guidance of Mr Varon then Assistant Director of the United Nations Centre for Natural Resources Energy and Transport **Financial World** ,1918 **Mineral Facts and Problems** United States. Bureau of Mines,1980 Winners and Losers D. Michael Shafer,2018-07-05 No detailed description available for Winners and Losers Between a Rock and a Hard Place Oiva W. Saarinen,2006-01-01 Where else can that well known phrase be better applied than to a study of the Finns in Sudbury Rock defines the physical reality of the Sudbury setting rugged hills mines farms and forests set in the Precambrian Shield Hard defines the human setting Finnish immigrants having to contend with the problems and stresses of relocating to a new culture with livelihoods that required great endurance as well as a tolerance for hazardous conditions Since 1883 Finnish immigrants in Sudbury men and women alike have striven to improve their lot through the options available to them Despite great obstacles the Finns never flagged in their unwavering fight for workers rights and the union movement And as agricultural settlers labour reformers builders of churches halls saunas and athletic fields Finns left an indelible imprint on the physical and human landscape In the process they have played an integral part in the transformation of Sudbury from a small struggling rail town to its present role as regional capital of northwestern Ontario This penetrating study of the cultural geography of the Finns in the Sudbury region provides an international national and local framework for analysis a model for future studies of other cultural groups World Metal Markets Patricia Perkins,1997-10-28 The United States holds strategic stockpiles of nearly 100 industrial minerals metals and other commodities These stockpiles have influenced the world commodity markets in many ways This work brings together in one place documentary and statistical evidence about the size and nature of the U S strategic stockpiles and the ways in which this influence has been evidenced in

F. Chapman,F. Roberts,2013-10-22 Metal Resources and Energy was initially aimed at exploring the future availability of metals and the energy required to produce them During the detailed planning of the book the authors decided to extend the remit to consider fuel use in relation to resources and future availability In order to explore this relationship a framework was established which provided an agenda of topics to examine In the process of systematically working through this agenda a deeper understanding of resource issues and some new insights were obtained This book develops a framework for assessing the future availability of metals by first reviewing the activities associated with the production of metals These can be divided into four broad categories exploration and establishment mining concentrating and smelting and refining It then examines factors such as energy economics forecasting issues resources and reserves estimation and trends in technical efficiency Subsequent

chapters deal with the evaluation of fuel use in metals production the secondary production of metals from scrap and other waste materials non technical issues that are potential sources of short term crises and other applications of energy data This book is intended for final year students of engineering geology and economics all of whom will find all the topics covered relevant to their studies It attempts to convey the essentials of resource economics metal production technology energy analysis and those aspects of geology and geochemistry which are pertinent to a study of resource issues The full breadth of topics is covered at a depth which is comprehensible to students from other disciplines East European Economies Post-Helsinki United States.
