Copular Clauses Line Mikkelsen, 2005-01-01 LC Number 2005054553 **Copular Clauses** Line Mikkelsen, 2005-10-13

This book is concerned with a class of copular clauses known as specificational clauses and its relation to other kinds of copular structures predication and equative clauses in particular Based on evidence from Danish and English I argue that specificational clauses involve the same core predication structure as predication clauses one which combines a referential and a predicative expression to form a minimal predication unit but differ in how the predication core is realized syntactically Predication copular clauses represent the canonical realization where the referential expression is aligned with the most prominent syntactic position the subject position Specificational clauses involve an unusual alignment of the predicative expression with subject position I suggest that this unusual alignment is grounded in information structure the alignment of the less referential DP with the subject position serves a discourse connective function by letting material that is relatively familiar in the discourse appear before material that is relatively unfamiliar in the discourse Equative clauses are argued to be fundamentally different **The Linguistics of Olfaction** Łukasz Jędrzejowski, Przemysław

Staniewski, 2021-04-26 This volume presents novel cross linguistic insights into how olfactory experiences are expressed in typologically unrelated languages both from a synchronic and from a diachronic perspective It contains a general introduction to the topic and fourteen chapters based on philological investigation and thorough fieldwork data from Basque Beja Fon Formosan languages Hebrew Indo European languages Japanese Kartvelian languages Purepecha and languages of northern Vanuatu Topics discussed in the individual chapters involve inter alia lexical olfactory repertoires and naming strategies non literal meanings of olfactory expressions and their semantic change reduplication colexification mimetics and language contact The findings provide the reader with a range of fascinating facts about perception description contribute to a deeper understanding of how olfaction as an understudied sense is encoded linguistically and offer new theoretical perspectives on how some parts of our cognitive system are verbalized cross culturally This volume is highly relevant to lexical typologists historical linguists grammarians and anthropologists Linguistic Theory and South Asian Languages

Josef Bayer, Tanmoy Bhattacharya, Musaliyar Veetil Tharayil Hany Babu, 2007-01-01 The South Asian languages mainly Indo Aryan and Dravidian have become a focus of interest in the formal study of language as a natural consequence of the research program of the Principle and Parameters approach and an enforced interest in exploring the parametrical space of human language The contributions to the present volume combine theoretical reasoning in syntax and phonology with a comparative research agenda in which South Asian languages figure prominently The topics range from issues of clause structure serial verb constructions cleft and question formation to the question of what the proper syntactic format of modification should be issues of binding theory and raising and issues of complementation the clausal periphery and clausal typing The collection of articles concludes with two chapters on Dravidian and comparative phonology and a chapter on the

shaping of phonological awareness by different writing systems The authors and the editors devote this piece of work to Professor K A Jayaseelan one of present day India s most influential linguists Non-definiteness and Plurality Svetlana Vogeeler,Liliane Tasmowski,2006-01-01 This collection of studies by leading scholars in the field focuses on the semantics of non definite bare and indefinite plural NPs The contributions in the first part concentrate on bare plurals and their cross linguistic counterparts They discuss applicability of the notion of semantic incorporation to bare plurals by contrasting them to bare singulars with the aim of accounting for the interaction between the semantics of number and the degree of in dependency of the NP with respect to the verb The articles in the second part examine the relationship between the semantics of number and the semantics of aspect The contributions in the third part concentrate on non definite numerical noun phrases by addressing a range of fundamental questions such as the semantics of indefinite time phrases numerals in classifier and non classifier languages scope interactions the at least and exactly readings referential properties of numerals The volume will be welcomed by linguists interested in the semantics of number in non definite NPs

Agreement Systems Cedric Boeckx,2006-01-01 Agreement plays a central role in modern generative grammar The present collection brings together contributions from experts on various aspects of agreement systems in the world s languages in an attempt to formulate formal and substantive universals in this domain All the papers contained here focus on the formalization of the mechanisms of agreement and on the relationship between case and agreement All the papers propose solutions by seriously examining cross linguistic data from the usual Germanic and Romance languages to Lummi Greek Hindi Turkish and other Turkic languages Japanese Tsez Masaai Russian Arabic Basque Warlpiri Kaltakungu and Bantu The Syntax-Discourse Interface Petra B. Schumacher,2005-09-22 This book combines theoretical and experimental aspects of the establishment of dependency It provides an account of dependency relations by focusing on the representation and interpretation of referentially dependent elements particularly regular reflexives logophors and pronouns First the establishment of dependency is discussed within a model of syntax discourse correspondences that predicts an economy based dependency hierarchy contingent on the level of representation at which the dependency is formed as well as the internal structure of the dependent element and its antecedent Secondly the model s predictions are substantiated by a series of experimental studies conducted in English and Dutch providing evidence from three sources of online sentence comprehension reaction time studies Broca s aphasia patient studies and event related brain potential studies The findings show that dependencies are established at distinct levels of linguistic encoding i e syntax or discourse determined by the presence or absence of coargumenthood and the representation of the dependency forming elements Studies on Agreement João Costa,Maria Cristina Figueiredo Silva,2006 The status of agreement is a core issue in current morphological and syntactic theory The collection of papers in this volume focuses on important issues such as the nature of the relation between syntax and morphology in determining agreement relations whether and which syntactic configurations are relevant

for determining agreement the relevance of verbal agreement for the purposes of EPP the inquiry into the existence of connections between verbal and DP internal agreement on the morphological and syntactic distinction of person number and gender agreement how and why AGREE and Spec head relations trigger different agreement effects and the type of relation that exists between head movement and morphological agreement The data collected come from a wide variety of languages and the studies presented discuss innovative and thought provoking ideas for dealing with agreement phenomena

Minimalist Essays Cedric Boeckx, 2006-05-09 The Minimalism Program is many things to many researchers and there are by now many alternative versions of it Central to all is the fundamental question to what extent is the human language faculty an optimal solution to minimal design specifications Taken as a whole the volume outlines the main features of Minimalism its historical and conceptual sources and provides an illustration of minimalist theorizing by looking at several properties of the syntactic component of grammar Some contributions concentrate on what kind of computational tools are made available in a minimalist syntactic component and how the computational system interacts with external and interface domains of the mind brain Other contributions specifically focus on direct empirical gains that emerge from adopting minimalist guidelines

The Minimalist Syntax of Defective Domains Acrisio Pires, 2006-10-31 This book unifies the analysis of certain non finite domains focusing on subject licensing agreement and Case and control It proposes a minimalist analysis of English gerunds which allows only a null subject PRO TP defective gerunds a lexical subject gerunds as complements of perception verbs or both types of subjects clausal gerunds It then analyzes Portuguese infinitives showing that the morphosyntactic properties of non inflected and inflected infinitives correlate with distinct treatments of obligatory and non obligatory control It explores these and other phenomena to show that tense and event binding do not correlate with the contrast between control and raising exceptional case marking ECM against null Case theories of control A Probe Goal approach to Case and agreement is adopted in combination with a movement analysis of control The book then investigates diachronic morphosyntactic phenomena involving infinitives verb movement and cliticization in Portuguese exploring a cue based theory of syntactic change grounded in language acquisition

Narrow Syntax and Phonological Form Gema Chocano, 2007-05-16 Scrambling the kind of word order variation found in West Germanic languages has been commonly treated as a phenomenon completely unrelated to North Germanic Object Shift This book questions this view and defends a unified analysis on the basis of strictly syntactic and phonological evidence Given that its main conclusions are drawn from German data it also sheds light on several problematic aspects of the grammar of this language which have traditionally resisted a principled account Prominent among these are the inconsistent behaviour of German coherent infinitives with respect to extraction of their internal arguments the existence of a less liberal type of Scrambling within topicalised VPs the link between reordering possibilities and headfinalness the asymmetry exhibited by monotransitive and ditransitive structures with respect to the interaction between Scrambling and the unmarked word order and finally certain anomalies in

the reordering of the lower arguments of ditransitive predicates that assign inherent case *The Distribution of Pronoun Case Forms in English* Heidi Quinn, 2005-07-28 This book offers an in depth analysis of Modern English pronoun case The author examines case trends in a wide range of syntactic constructions and concludes that case variation is confined to strong pronoun contexts Data from a survey of 90 speakers provide new insights into the distributional differences between strong 1sg and non 1sg case forms and reveal systematic case variation within the speech of individuals as well as across speakers The empirical findings suggest that morphological case is best treated as a PF phenomenon conditioned by semantic syntactic and phonological factors In order to capture the way in which these linguistic factors interact to produce the pronoun case patterns exhibited by individual speakers the author introduces a novel constraint based approach to morphological case Current case trends are also considered in a wider historical context and are related to a change in the licensing of structural arguments *Infinitival Syntax* Tanja Schmid, 2005-06-22 This monograph offers a new analysis of West Germanic Infinitivus Pro Participio IPP constructions within the framework of Optimality Theory IPP constructions have long been problematic for syntactic theory because a bare infinitive is preferred over the expected past participle The book shows how the substitution of the past participle by the infinitive in IPP constructions can be captured straightforwardly if constraints are assumed to be violable The basic idea is that IPP constructions are exceptional because they violate otherwise valid rules of the language Thus IPP is a last resort or repair strategy which is only visible in cases in which the past participle would be even worse Furthermore as the choice of Optimality Theory naturally leads to a crosslinguistic account the book systematically examines and compares infinitival constructions from seven West Germanic languages including Afrikaans Dutch German West Flemish and three Swiss German dialects **The Function of Function Words and Functional Categories** Marcel den Dikken, Christina Tortora, 2005-08-25 This volume brings together papers which address a range of issues regarding the syntax of function words and functional categories in the Germanic languages The works offered in this volume derive specifically from comparative studies of Germanic at the same time they all bear directly on long standing problems in syntactic theory and universal grammar The contributions include novel theoretical and empirical approaches to infinitives the syntax and acquisition of Verb Second the structure and interpretation of present tense the syntax and semantics of reflexives the relationship between expletive syntax and the EPP the syntax of possession and the DP internal syntax of pronouns Some contributions present the results of experimental research which provide an entirely fresh perspective on previously unchallenged claims **Perspectives on information structure in Austronesian languages** Sonja Riesberg, Asako Shiohara , Atsuko Utsumi , 2018 Information structure is a relatively new field to linguistics and has only recently been studied for smaller and less described languages This book is the first of its kind that brings together contributions on information structure in Austronesian languages Current approaches from formal semantics discourse studies and intonational phonology are brought together with language specific and cross linguistic expertise of Austronesian

languages The 13 chapters in this volume cover all subgroups of the large Austronesian family including Formosan Central Malayo Polynesian South Halmahera West New Guinea and Oceanic The major focus though lies on Western Malayo Polynesian languages Some chapters investigate two of the largest languages in the region Tagalog and different varieties of Malay others study information structural phenomena in small underdescribed languages The three overarching topics that are covered in this book are NP marking and reference tracking devices syntactic structures and information structural categories and the interaction of information structure and prosody Various data types build the basis for the different studies compiled in this book Some chapters investigate written texts such as modern novels of Djennar's chapter on modern standard Indonesian or compare different text genres such as for example oral narratives and translations of biblical narratives of De Busser's chapter on Bunun Most contributions however study natural spoken speech and make use of spoken corpora which have been compiled by the authors themselves The volume comprises a number of different methods and theoretical frameworks Two chapters make use of the Question Under Discussion approach developed in formal semantics of the chapters by Latrouite Shiohara Riester Riesberg et al apply the recently developed method of Rapid Prosody Transcription RPT to investigate native speakers perception of prosodic prominences and boundaries in Papuan Malay Other papers discuss theoretical consequences of their findings Thus for example Himmelmann takes apart the most widespread framework for intonational phonology ToBI and argues that the analysis of Indonesian languages requires much simpler assumptions than the ones underlying the standard model Arka Sedeng ask the question how fine grained information structure space should be conceptualized and modelled e.g. in LFG Schnell argues that elements that could be analysed as topic and focus categories should better be described in terms of packaging and do not necessarily reflect any pragmatic roles in the first place

The Rise of Agreement Eric Fuss, 2005-01-01 This book investigates the historical paths leading from pronouns to markers of verbal agreement and proposes a unified formal account of this grammaticalization process In opposition to beliefs widely held in the literature it is argued that new agreement formatives can be coined in a multitude of syntactic environments Still the individual paths toward agreement are shown to exhibit a set of underlying similarities which are attributed to universal principles that govern the reanalysis of pronominal clitics as exponents of verbal agreement across languages It is claimed that syntactic principles impose only a set of necessary conditions on the reanalysis in question while its ultimate trigger is morphological in nature More specifically it is argued that the acquisition of inflectional morphology is governed by blocking effects which operate during language acquisition and promote the grammaticalization of new markers if this change serves to replace worn out underspecified forms with new more specified candidates

Pragmatics and Autolexical Grammar Etsuyo Yuasa, Tista Bagchi, Katharine Beals, 2011-04-29 This book presents papers in honor of Jerry Sadock's rich legacy in pragmatics and Autolexical Grammar Highlights of the pragmatics section include Larry Horn on almost barely and assertoric inertia William Lycan on Sadock's resolution of the Performatory with truth¹ and

truth2 and Jay Atlas on Moore s Paradox and the truth value of propositions of belief Highlights of the Autolexical Grammar section include Fritz Newmeyer s comparison of the minimalist autolexical and transformational treatments of English nominals Barbara Abott s extension of Sadock s PRO less syntax to a PRO less semantics of the infinitival complements of know how and Haj Ross s syntactic connections between semantically related English pseudoclefts Encompassing a range of languages Aleut Bangla Greenlandic Japanese and a home based sign language and extending into psycholinguistics language acquisition sentence processing and autism this volume will interest a range of readers from theoretical linguists and philosophers of language to applied linguists and exotic language specialists

Nominal Phrases from a Scandinavian Perspective Marit Julien,2005-01-01 This monograph presents a new model of the internal syntax of nominal phrases The model is mainly based on Scandinavian since with the wide range of variation that Scandinavian displays in the nominal domain despite the close genetic relationship between the different varieties Scandinavian is particularly well suited for explorations into nominal syntax Among the topics covered are the basic syntactic structure of nominal phrases definiteness adjective phrases possessors relative clauses and nominal predicates The model is however meant to be a tool for analysing the nominal phrases of any language While the base generated structure is taken to be universally uniform the model allows for variation in the feature makeup of individual elements in the phonological realisation of the features and in the movements that may or may not apply Hence as shown in the final chapter patterns found in languages outside of Scandinavian can also be accounted for within the model

Clefts and their Relatives Matthew Reeve,2012-06-06 Cleft constructions have long presented an analytical challenge for syntactic theory This monograph argues that clefts and related constructions cannot be analysed in a straightforwardly compositional manner Instead it proposes that the locality conditions on modification for example by a restrictive relative clause must be reformulated such that they account for the apparent compositionality of DP internal modification whilst also permitting discontinuous modification of the type which is independently needed for constructions such as relative clause extraposition The empirical focus of the book is on clefts in English and Russian which have a similar interpretation but considerably divergent syntactic structures The author argues that despite these syntactic differences both types of cleft are mapped to their semantic interpretations in the same manner This monograph will be essential reading for those working on cleft constructions and copular sentences more generally and will be of interest to those working on the syntax semantics interface

Advances in the Syntax of DPs Anna Bondaruk,Gréte Dalmi,Alexander Grosu,2014-10-15 The contributions in this volume are devoted to various aspects of the internal and external syntax of DPs in a wide variety of languages belonging to the Slavic Turkic Finno Ugric Semitic and Germanic language families In particular the papers address questions related to the internal and external cartography of various types of simplex and complex DPs the position of DPs within larger structures agreement in phi features and or case between DPs and their predicates as well as between sub elements of DPs and or the assignment of case to DPs in specific

configurations The first four chapters of the book focus primarily on the external syntax of DPs and the remaining chapters deal with their internal syntax
