Copyright Law Benedict Atkinson, 2017-07-05 This volume shows how since 1950 the growth of copyright regulation has followed and enabled the extraordinary economic growth of the entertainment broadcasting software and communications industries It reproduces articles written by an extensive list of leading thinkers US scholars represented in readings include James Boyle Lawrence Lessig Pamela Samuelson Mark Lemley Alfred Yen Julie Cohen Peter Jaszi and Eben Moglen Leading non US contributors include Alan Story Brian Fitzgerald and Peter Drahos These and other authors explain copyright origins the development of the law the theory of enclosure international trends recent developments and current and future directions Today the copyright system is often portrayed as an engine of growth and effective regulation as a predictor of economic development However critics see dangers in the expansion of intellectual property rights The articles in this volume focus principally on the digital age examining how copyright regulation is likely to affect goals of dissemination and access

The Oxford Handbook of Intellectual Property Law Rochelle C. Dreyfuss, Justine Pila, 2018-04-12 We live in an age in which expressive informational and technological subject matter are becoming increasingly important Intellectual property is the primary means by which the law seeks to regulate such subject matter It aims to promote innovation and creativity and in doing so to support solutions to global environmental and health problems as well as freedom of expression and democracy It also seeks to stimulate economic growth and competition accounting for its centrality to EU Internal Market and international trade and development policies Additionally it is of enormous and increasing importance to business As a result there is a substantial and ever growing interest in intellectual property law across all spheres of industry and social policy including an interest in its legal principles its social and normative foundations and its place and operation in the political economy This handbook written by leading academics and practitioners from the field of intellectual property law and suitable for both a specialist legal readership and an intelligent but non specialist legal and non legal readership provides a comprehensive account of the following areas The foundations of IP law including its emergence and development in different jurisdictions and regions The substantive rules and principles of IP and Important issues arising from the existence and operation of IP in the political economy

African Yearbook of International Law / Annuaire Africain de Droit International, Volume 12 (2004) A. A. Yusuf, 2005-11-01 Founded in 1993 the African Yearbook now published under the auspices of the African Foundation for International Law is the only scholarly publication devoted exclusively to the study development dissemination and wider appreciation of international law in Africa as a whole Through the scholarly analysis of international legal issues of particular relevance to the African continent it also contributes to the acceptance of and respect for the rule of law in intra African relations and for the principles of international law in general Its uniqueness however goes beyond this for through its special themes and general articles it has succeeded over the years to serve as an intellectual

forum where the development of international law is viewed as being integral to Africa's own development. Through the study and analysis of emerging legal issues of particular relevance to Africa such as the creation of viable continental institutions capable of promoting unity and security for the peoples of the continent, the effective protection of human rights, the need for accountability for mass killings and massive violations of the rule of law, the promotion of a rule-based democratic culture, the role of African countries in a globalizing world economy and in international trade relations, the Yearbook strives to be responsive to the intellectual needs of African countries in the area of international law and to the continuing struggle for creating an environment conducive to the rule of law throughout the continent. The Yearbook also provides ready access to the basic documents of African international organizations by regularly publishing the resolutions and decisions of regional and sub-regional organizations as well as the conventions, protocols and declarations adopted by pan-African agencies.

Energy Statistics of OECD Countries, 2004-2005 International Energy Agency, 2007. This volume contains data on energy supply and consumption in original units, i.e. units related to each type of energy for coal, oil, gas, electricity, heat, renewables and waste. Historical tables summarise data on production, trade and final consumption. The book also includes definitions of products and flows and explanatory notes on the individual country data. **Digital Economies: SMEs and**

E-Readiness Mutula, Stephen M., 2009-07-31. This book provides valuable insights into the current state of the digital economy and the ability of SMEs to leverage Information and Communication Technologies (ICTs) so that they may overcome their traditional laggard position in the global business market. Provided by publisher. **Access-right** Zohar Efroni, 2011. Copyright law has become the subject of general concerns that reach beyond the limited circles of specialists and prototypical rights holders. The role, scope and effect of copyright mechanisms involve genuinely complex questions. Digitization trends and the legal changes that followed drew those complex matters to the center of an ongoing public debate. In *Access Right: The Future of Digital Copyright Law*, Zohar Efroni explores theoretical, normative and practical aspects of premising copyright on the principle of access to works. The impetus to this approach has been the emergence of technology that many consider a threat to the intended operation and perhaps even to the very integrity of copyright protection in the digital setting. It is the ability to control digital works already at the stage of accessing them by means of technological protection measures. The pervasive shift toward the use of digital technology for the creation, dissemination, exploitation and consumption of copyrighted material warrants a shift also in the way we perceive the structure of copyright rules. Premising the copyright order on the concept of digital access first calls for explaining the basic components of proprietary access control over information in the abstract. The book then surveys recent developments in the positive law while showing how the theoretical access right construct could explain the logic behind them. Finally, the book critically analyzes existing approaches to curbing the resulting problems of imbalance and overprotection, which are said to disadvantage users. In conclusion, the book advocates for a structural overhaul of our current regulative apparatus. The proposed reform involves a

series of changes in the way we define copyright entitlements and in the way in which those entitlements may interrelate within a single coherent scheme

Intellectual Property and Free Trade Agreements in the Asia-Pacific Region Christoph Antons,Reto M. Hilty,2014-12-05 This book is highly topical The shift from the multilateral WTO negotiations to bilateral and regional Free Trade Agreements has been going on for some time but it is bound to accelerate after the WTO Doha round of negotiations is now widely regarded as a failure However there is a particular regional angle to this topic as well After concluding that further progress in the Doha round was unlikely Pacific Rim nations recently have progressed with the negotiations of a greatly expanded Trans Pacific Partnership Agreement that includes industrialised economies and developed countries such as the United States Japan Australia and New Zealand recently emerged economies such as Singapore but also several developing countries in Asia and Latin America such as Malaysia and Vietnam US and EU led efforts to conclude FTAs with Asia Pacific nations are also bound to accelerate again after a temporary slowdown in the negotiations following the change of government in the United States and the expiry of the US President s fast track negotiation authority The book will provide an assessment of these dynamics in the world s fastest growing region It will look at the IP chapters from a legal perspective but also put the developments into a socio economic and political context Many agreements in fact are concluded because of this context rather than for purely economic reasons or to achieve progress in fields like IP law The structure of the book follows an outline that groups countries into interest alliances according to their respective IP priorities This ranges from the driving forces of the EU US and Japan via Asia Pacific resource rich but IP poor economies such as Australia and New Zealand recently emerged economies with strong IP systems such as Singapore and Korea to leading developing countries such as China and India and second tier industrializing economies such as Thailand Malaysia and Indonesia

The Evolution of Business

Knowledge Harry Scarbrough, 2008-06-05 Top executives increasingly see the competitive advantage of their firms coming from their ability to exploit knowledge and learning Policy makers likewise see the fate of national and regional economies being determined by the emergence of a knowledge economy These views place great importance on the way in which knowledge evolves within business However to date our understanding of that evolution has been limited by a tendency to see knowledge as simply a resource or input to be transformed into outputs This R D centred view of business knowledge has recently been challenged by other views which emphasize the contribution of organizational learning social practices and management structures to its evolution within and between organizations Competitive success is seen as dependent on the firm's ability to mobilize all of these different kinds of knowledge Based on the findings of a major research programme funded by the UK's ESRC Economic and Social Research Council and DTI Department for Trade and Industry this book makes a major contribution to this emerging picture of the evolution of business knowledge The detailed empirical studies contained within it have been undertaken by some of the UK's leading management researchers They cover a variety of sectors ranging from overtly knowledge producing institutions such as business schools and the scientific professions through intermediary groups such as consultants and lobby groups to the creation and application of knowledge by firms large and small This work highlights the impact of different institutional contexts social networks and technological artefacts on the way different groups share and exploit knowledge for business goals Its findings challenge the idea that knowledge and learning are simply a resource or input to be directed by managers and policy makers Instead they show how knowledge evolves through its embedding and disembedding within different business contexts as much despite of rather than because of the efforts of management and policy makers who are often more concerned with the day to day pressures of their own

roles **Handbook on the Economics of Retailing and Distribution** Emek Basker, 2016-01-29 This Handbook explores and critically examines current research in economics and marketing science on key issues in retailing and distribution. Providing a rich perspective for the discussion of public policy, contributions from several disciplines and continents range from the history of chains and the impact of multinational retailers on international trade patterns to US merger policy in the retail context, the rise of the Internet and consumer-to-consumer sales. The chapters address methodological issues such as the structural estimation of entry games between retailers, productivity measurement when both inputs and output are not fully observable, and demand estimation with variable assortment. Policy issues explored include mergers, zoning, and the regulation of buyer power, while other chapters address some of the recent exciting developments in technology, retail formats, and data availability. The book goes on to study the changes in online retailing and big data and to examine competition in specific retail sectors including gasoline stations, automobile dealerships, supermarkets, and big box retail. This state-of-the-art Handbook is an essential reference for students and academics of economics and marketing science and offers an outsider's perspective to specialists in operations research, data analytics, geography, and sociology.
