Corbusier Mein Werk:

Le Corbusier, History and Tradition Armando Rabaça, 2017-05-01 The view of modernism as representing an epistemological break between technology and history and tradition has long been challenged Le Corbusier's work has proved to be an inexhaustible reference point in this debate This is due on the one hand to the legacy of nineteenth century historicism and on the other to his creative process of creation through destruction which as John Summerson has noted is comparable to the processes of avant garde poets and painters The contributions to this book explore particular episodes which bring to light both the operative role of the past in the creation of a new abstract synthesis and Le Corbusier's modernist historical consciousness They illustrate how the past participated in the modernist creative process of abstract art from the 1920s machine aesthetics to the late infatuation with myth They also shed light on the extent to which the operative quality of the history was framed by a comprehensive historical vision that took the form of metanarrative which neither the analytical studies on his architecture nor the synthetic approaches to his philosophical thinking should dismiss *Le Corbusier* Stanislaus von Moos, 2009 Originally published in Germany in 1968 this first comprehensive and critical survey of Le Corbusier's life and work soon became the standard text on the architect and polymath French Spanish English Japanese and Korean editions followed but the book has now been out of print for almost two decades In the meantime Le Corbusier's archives in Paris have become available for research resulting in an avalanche of scholarship Von Moos critical take and the basic criteria by which the subject is organized and historicized remain surprisingly pertinent in the context of this recent jungle of Corbusier studies This new completely revised edition is based on the 1979 version published in English by the MIT Press but offers a substantially updated body of illustrations Each of the seven chapters is supplemented by a critical survey of recent scholarship on the respective issues An updated edition of this acclaimed book an essential read for students of architecture and architectural history Interior Spaces Christian Schittich, 2012-12-17 Space light and material from the meditative ambiance of a chapel or synagogue to the colourful organic forms of fashion boutiques the design of an interior space composed of lighting the surfaces textures and colours of materials finishing and features creates atmosphere and lends specific character The growing willingness on the part of designers in recent years to experiment with colours materials and spatial concepts is demonstrated in the range and diversity of international examples presented in this the third volume in the series In Detail All plans and drawings of interiors and furnishings have been carefully researched and drawn by the staff of DETAIL Three introductory essays by expert authors are followed by 28 exemplary case studies by such names as Alvaro Siza Future Systems Dominique Perrault and Herzog de Meuron Rethinking Architecture Neil Leach, 2005-12-20 This book brings together the core writings on architecture by key philosophers and cultural theorists of the twentieth century the very best theoretical writings on the ideas which have shaped our cities and experiences of architecture Citizenship as Cultural Flow Subrata K Mitra, 2013-01-29 The book addresses the very topical subject of

citizen making By delving into a range of sources among them survey questions historical documents political theory architectural design and public policy the book provides a unique analysis of when and why citizenship has taken root in India Each chapter highlights the constant innovation of citizenship that has occurred in India s legal political social economic and aesthetic arrangements as well as providing the basis for comparative analysis across South Asian cases and the European Union
