Coping With Crisis Understanding And Helping People In Need:

Coping with Crisis Stephen Murgatroyd, Ray Woolfe, 1986 **Keep Your Cooooooool!** Tina Rae, George

Robinson, 2002-01-01 As one would expect from a publisher with a proven track record in books on behaviour management well illustrated easy to use and potentially very effective Highland Would be a useful resource to encourage the inclusion of emotional literacy to a wider audience without giving away the psychology It could easily be used by teachers as a package or be used in conjunction with an EP where schools need more encouragement to feel less confident I would recommend this as a useful practical resource for schools Educational Psychology in Practice All people including young people face tensions and stress but its how we learn to manage stress thats important The sections of this book cover what is stress who becomes affected by stress the stresses faced by young people good ways to beat stress new ways of coping with stress The sections use stories to help children understand stress and how it manifests itself and to develop a set of skills and coping strategies There are comprehensive teacher notes photocopiable worksheets and a variety of stress management strategies This resource is intended for whole class group work and is not recommended for individual support for children who have suffered severe trauma

Welfare Research Fiona William, Jennie Popay, Ann Oakley, 2005-08-12 First published in 1998 This book attempts to contribute a new framework for social research in the welfare field As such it engages with new theories new approaches and new methods alongside a constructive critique of both the old and the new It attempts to illustrate approaches to conceptualization and operationalization within policy relevant research to reflect and explore both new thinking in social theory and in welfare policy as well as to maintain a connection with old concerns Our concern is with welfare research both theory and method broadly defined as the wider landscape of policy and provision captured in the past at least by the notion of the welfare state The new thinking with which the book is primarily concerned involves a shift away from seeing people as the passive beneficiaries of welfare provided through state interventions and professional expertise and from seeing them as fixed single social categories of poor old single parent or as one dimensional objective socio economic classifications
