Baines, 1999 Measuring Peace Richard Caplan, 2019-04-25 How can we know if the peace that has been established following a civil war is a stable peace More than half of all countries that experienced civil war since World War II have suffered a relapse into violent conflict in some cases more than once Meanwhile the international community expends billions of dollars and deploys tens of thousands of personnel each year in support of efforts to build peace in countries emerging from violent conflict This book argues that efforts to build peace are hampered by the lack of effective means of assessing progress towards the achievement of a consolidated peace Rarely if ever do peacebuilding organizations and governments seek to ascertain the quality of the peace that they are helping to build and the contribution that their engagement is making or not to the consolidation of peace More rigorous assessments of the robustness of peace are needed These assessments require clarity about the characteristics of

and the requirements for a stable peace This in turn requires knowledge of the local culture local history and the specific conflict dynamics at work in a given conflict situation Better assessment can inform peacebuilding actors in the reconfiguration and reprioritization of their operations in cases where conditions on the ground have deteriorated or improved To build a stable peace it is argued here it is important to take the measure of peace **Bringing Peace to the**
