Statutory Priorities in Corporate Insolvency Law Christopher F. Symes, 2016-12-05 Who enjoys statutory preferred creditor status? What justifications exist for jurisdictions to maintain statutes that favour priority creditors over other creditors and contributories? This book examines preferential debts derived from specific legislative provisions applying to corporate insolvency. In exploring the concept of preferential treatment, Statutory Priorities in Corporate Insolvency Law includes chapters that provide a doctrinal theoretical and historical analysis of who enjoys preferred creditor status. As well as examining the traditional major categories of priorities, this work also identifies potential new categories for priority status such as environmental clean up costs, international creditors, tort claimants and consumers among other non consensual creditors. While the study focuses on Australian corporate insolvency law, where appropriate comparisons are made with other common law jurisdictions, particularly the UK, Canada, New Zealand and the US.

Introduction to Corporate and Personal Insolvency Law Fiona M. Tolmie, 1998-01-01 This work is unusual in that it brings together both elements of insolvency, corporate and personal, to provide a coherent introduction to this vast and dynamic area of law. Legal and Ethical Standards in Corporate Insolvency Elizabeth Streten, 2024-06-17 Recent financial crisis and the global financial impacts of the COVID 19 pandemic have brought renewed interest to the regulation and practice of corporate insolvency and restructuring. Modernisation of the insolvency profession and the regulation of its practitioners is a contemporary concern, and recent years have seen significant reforms of insolvency law. The success of such reforms can be enhanced through a clear understanding of difficulties faced by the insolvency profession in achieving successful restructuring and insolvency outcomes, and through the determination of effective solutions to those difficulties. However, there is limited empirical data to inform the day to day practice of insolvency, nor the difficulties experienced by insolvency practitioners in pursuing insolvency and restructuring solutions. This book addresses this absence of data and understanding, examining the role and practice of corporate insolvency practitioners and exploring the challenges that they encounter. Offering an empirical study together with a comparative analysis of the experiences of practitioners around the world, this book facilitates a greater understanding of corporate insolvency practice, confronting a misunderstanding of and under confidence in corporate insolvency practitioners, making it key reading for academics, practitioners and regulators working in the area of corporate insolvency.
