Re-Envisioning and Restructuring Blended Learning for Underprivileged Communities Bosch, Chantelle, Laubscher, Dorothy Joy, Kyei-Blankson, Lydia, 2021-05-14 Challenges in the educational arena are not new phenomena However with the recent outbreak of the COVID 19 pandemic researchers and educators have been made even more aware of the need for a paradigm shift in education Blended learning as opposed to fully online learning or traditional face to face teaching has been well researched and has been found to have the potential to provide better educational solutions in challenging contexts These contexts range from pandemic situations where social distancing is the order of the day to financial and time constraints regarding full time study as well as limited physical capacity at institutions Blended learning solutions are often designed for resourceful institutions and cannot be easily implemented in developing countries and in communities where resources are limited Typical issues like connectivity accessibility lack of suitable devices and affordability need to be taken into consideration and in cognizance of blended learning interventions These challenges are often neglected in blended learning research but are critical discussions to be had Re Envisioning and Restructuring Blended Learning for Underprivileged Communities shares how institutions in the

developing world and less privileged communities have re imagined and restructured blended education to enhance teaching and learning for underprivileged communities This book aims to address blended learning solutions across institutional program course and activity levels The chapters will cover a variety of learning environments from rural settings to less developed countries and more and explore the programs and courses designed to improve student success and accessibility in diverse student populations This book is ideally intended for teachers administrators teacher educators practitioners stakeholders researchers academicians and students who are interested in blended learning opportunities in less privileged settings and to underserved and marginalized populations **Avant-Garde Sociology Workbook** Thomas D. Viviana A. Zelizer,2013-03-24 Revealing the human side of economic life Over the past three decades economic sociology has been revealing how culture shapes economic life even while economic facts affect social relationships This work has transformed the field into a flourishing and increasingly influential discipline No one has played a greater role in this development than Viviana Zelizer one of the world s leading sociologists Economic Lives synthesizes and extends her most important work to date demonstrating the full breadth and range of her field defining contributions in a single volume for the first time Economic Lives shows how shared cultural understandings and interpersonal relations shape everyday economic activities Far from being simple responses to narrow individual incentives and preferences economic actions emerge persist and are transformed by our relations to others Distilling three decades of research the book offers a distinctive vision of economic activity that brings out the hidden meanings and social actions behind the supposedly impersonal worlds of production consumption and asset transfer Economic Lives ranges broadly from life insurance marketing corporate ethics household budgets and migrant remittances to caring labor workplace romance baby markets and payments for sex These examples demonstrate an alternative approach to explaining how we manage economic activity as well as a different way of understanding why conventional economic theory has proved incapable of predicting or responding to recent economic crises Providing an important perspective on the recent past and possible futures of a growing field Economic Lives promises to be

Taylor, 2023-07-03 This book provides a fresh look at the question of learner motivation and engagement beginning with an investigation of potential motivations not to learn the better to help instructors find more successful ways to engage learners in any given situation After examining various kinds of resistance to learning the book goes on to describe effective ways of overcoming resistance and engaging learners

Grounded in the literature of many fields such as Adult Education Psychology Sociology Cultural Anthropology and Communication as well as the author's own decades of experience the book connects the concepts surrounding learning resistance directly to engagement and human motivation drawing these ideas together to make the case for practicing motivational immediacy in all learning spaces The second section of the book focuses on the various tools effective teachers might use to mitigate learner resistance and foster authentic and lasting engagement The author devotes a chapter to using curriculum and Instructional Systems Design ISD processes to effectively foster engaged learning in different learning spaces and contexts Two chapters are devoted to applying the theory and methods to specific domains online learning environments and face to face classrooms with both undergraduate and graduate students The last section includes a chapter that provides a potential method to measure effectual learning in the classroom and one that addresses the ethical issues sometimes said to exist in efforts to mitigate learner resistance and foster engagement in its place The final chapter draws the book to a close by presenting a fluid whole that will greatly improve understanding of the ideas as well as the methods best used to reduce learning resistance increase learner engagement and facilitate motivational immediacy and effectual learning

Classroom Control (RLE Edu L) Martyn Denscombe, 2012-05-04 Survival as a school teacher depends on an ability to achieve classroom control In the years since this book was first published little has changed in this respect Classroom control continues to lie at the heart of competent teaching Teachers know it pupils know it They know it implicitly because they experience it as a normal part of their daily lives in schools But in this book the author stands back from our everyday knowledge about how things work in classrooms to ask what control actually consists of What is it How is it recognized How is it challenged by pupils How is it done by teachers How is it negotiated Drawing on extensive ethnographic fieldwork in three large secondary schools in England Martyn Denscombe explores the meaning of classroom control He looks at the influence of teacher training and the role of school organization in establishing expectations about control and then shows how control is played out through the interaction of teachers and pupils in class His analysis travels well across the many contexts in which teaching occurs and provides an illuminating insight into the work of teaching and the nature of classroom life His evidence is drawn from ethnographic fieldwork in three schools in England and secondary sources covering the phenomenon of classroom control in the UK USA and Australia
