With increased competition from new wine-producing countries and substitute products, declining wine consumption, climate change, health crises, and geopolitical contexts, the wine industry has been facing serious difficulties in recent years. Paradoxically, however, this recent period also offers new opportunities. Through the presentation of original research results, reading grids, illustrations, and case studies, *Wine Management and Marketing 2* analyzes the main challenges facing the wine industry and considers new opportunities: a renewed dynamism of technical, organizational, and commercial innovations; the adaptability of actors; a greater introduction of new technologies, etc. The multi-faceted approach adopted by the authors and experts offers an enriched reflection which provides a better understanding of the current state of the wine industry and presents various levers for adapting to new commercial, societal, and environmental expectations. *Service Management and Marketing* Christian Gronroos, 2016-01-26.
